Front cover credit: R Ray Clark (FRPS) & Mervyn De Calcina-Goff (FRPS) / Science Photo Library.

Human body thermograms. The thermograms show heat from a woman (left pair) and man (right pair) from the front (left of each pair) and back (right of each pair). Thermograms measure the infrared radiation emitted by a body, and areas are colour-coded by temperature, from light blue (cold) through pink, yellow and red to white (warmest).
