The rising cost of depression

The cost is considerable—in human suffering, in time spent in medical care, and in the number of drugs involved in treatment. 'Surmontil' cuts costs because it is a single compound with both antidepressive and psychosedative activity. 'Surmontil' reduces the need to prescribe concurrently two or three types of drug—an antidepressive, an anxiolytic and a hypnotic.

**Surmontil cuts the cost**

'Surmontil' is presented as tablets containing 25 mg. and 10 mg. trimipramine, and as injection solution, 12.5 mg. per ml.

An M&B brand Medical Product.

In Bronchitis

SEPTRIN

Abolishes pathogens, renders sputum mucoid and dramatically decreases sputum volume*

'Septrin' tablets
Each contain trimethoprim 80 mg, sulphamethoxazole 400 mg.

'Septrin' Paediatric tablets
Each contain trimethoprim 20 mg, sulphamethoxazole 100 mg.

Further information is available on request.

Burroughs Wellcome & Co. (The Wellcome Foundation Ltd.) London
In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles... the dangers inherent in straining... refusal to co-operate... the presence of pain, to which anal fissures or haemorrhoids may contribute... the need for enemas and suppositories... the risk of faecal impaction, with consequent manual removal...

Dorbex can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. Dorbanex produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

...have a straightforward solution

Now available in three forms—capsules and in two strengths of liquid—Dorbex provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, Dorbanex prepares the way for pain-free evacuation.

DORBANEX CAPSULES: each contains 1.8-dihydroxyanthraquinone 25 mg., poloxalene 200 mg. DORBANEX LIQUID: each 3 ml. teaspoonful contains 1.8-dihydroxyanthraquinone 25 mg., poloxalene 200 mg. DORBANEX FORTE: each 5 ml. teaspoonful contains 1.8-dihydroxyanthraquinone 75 mg., poloxalene 1000 mg.

Dosage DORBANEX CAPSULES: Adults, one or two capsules. Children, one capsule. DORBANEX LIQUID: Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery: two to four teaspoonfuls or two to four capsules. DORBANEX FORTE: one teaspoonful, or as directed by the physician. Treatment should be taken at bedtime. Contra-indications In common with other gastro-intestinal evacuants, Dorbanex should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. Side-effects Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients.

Basic NHS Prices Dorbanex Capsules: bottles of 30 capsules 8/6; bottles of 500 capsules 78.; Dorbanex Liquid: bottles of 50 ml. 4/-; bottles of 100 ml. 30.; Dorbanex For: bottles of 50 ml. 6/-. Additional information on request

Dorbex prepares the way for pain-free, trouble-free evacuation

Riker Laboratories Loughborough Leicestershire
now, for the first time a clinically proved appetite stimulant

'Periactin' induces a marked improvement in the appetite of many patients. The resulting weight gain is due only to the increased food intake—there is no disturbance of endocrine function, no evidence of fluid retention. 'Periactin' does not reproduce the effects of 'tonics', haematinics or vitamins. 'Periactin' acts promptly, and its dosage is simple. 'Periactin' will be invaluable for many of those situations in which patients, adults and children, require food and yet have no appetite for it.

Supplied as tablets containing the equivalent of 4 mg anhydrous cyproheptadine hydrochloride, and as a syrup containing the equivalent of 2 mg anhydrous cyproheptadine hydrochloride in each 5 ml. Detailed information is available to physicians on request. ® denotes registered trademark.

A UNIQUE ORAL GEL
WITH STRIKING ANALGESIC AND
ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the original infection Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

FORMULA: Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer 4.6%.

INDICATIONS: Herpes labialis, gingivitis, oral ulcerations, cheilosis denture sores, infant teething disorders.

PRESENTATION: Bonjela is available in 10 g. tubes at a basic N.H.S. cost of 2/8½d. per tube.

Women... can't help it

'Saluric'® can
in premenstrual tension with oedema

Women suffering from premenstrual tension with oedema cannot avoid the tiresome and inevitable signs and symptoms of this common condition, which may last from 7 to 10 days every month, prior to the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief.

'Saluric' can relieve swelling of the ankles, breast engorgement, and fullness of the abdomen. It may well help to alleviate the concomitant irritability and nervousness. 'Saluric' has been proved by 10 years of clinical experience to be a dependable diuretic which can be used month after month to control premenstrual tension with oedema.

Each tablet of 'Saluric' contains 500 mg chlorothiazide BP. Detailed information is available to physicians on request.

GOLF

It was the Scots who brought the game of golf to its greatest flowering, and it is the Royal and Ancient Club of St. Andrews which is supreme arbiter of the game today. It is they who lay down the rules, including the one, for instance, that says that the weight of the ball shall be not greater than 1.620 ounces avoirdupois and the size not less than 1.620 inches in diameter.

TRANSVASIN

Patients suffering from rheumatic symptoms obtain rapid relief with this well-proven and economical medication. The esters of nicotinic, salicylic and aminobenzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a valuable adjuvant in the treatment of osteo- and rheumatoid arthritis.

LLOYD-HAMOL

Transvasin

The standard treatment for rheumatic symptoms

Lloyd-Hamol Ltd., 103 Mount Street, London, W.1

Transvasin is a Trade Mark
All your fees paid, plus £790 a year and allowances, while a Medical student.

As a Medical Cadet in the Royal Army Medical Corps, all your tuition fees are paid by the Army. In addition, you are paid £790 a year, and are eligible for allowances.

You can apply for a Medical Cadetship if you have passed your second M.B. or its equivalent, are under 25, and have a place at a medical school in the United Kingdom or Eire. If you are about to take your second M.B., you may still apply; but your acceptance will be conditional on your passing the examination.

If accepted as a Medical Cadet, you are given the probationary rank of 2nd Lieutenant. On qualification, you are promoted Lieutenant, and are paid as such while you fulfil your pre-registration appointment —either at a civilian hospital of your own choice, or at certain military hospitals. After being fully registered, you are promoted Captain, and take up your duties in the RAMC.

Your obligation is then for five years of service on a Short Service Commission. During those five years, you will have a good chance of travel, make many friends, have ample leave (six weeks' paid leave a year, with a locum provided by the Army).

During that period you can, if you like, apply for a Regular Commission. Or you can leave the Army for civilian practice, the richer for some valuable experience of General Practice—and for a tax-free gratuity of up to £2,600 according to period of cadetship.

For further information about Medical Cadetships, or to arrange a meeting with an RAMC Officer to answer any questions you may have, write to: Colonel E. L. O. Hood MB, Ministry of Defence (AMD2), Dept. 537, Lansdowne House, Berkeley Square, London W1X 6AA
He cheats a little over exchanges... forgets his diet on holiday... and nothing very terrible happens – at the time. It's easy for the non-insulin dependent diabetic to lapse into complacency – but you can shake him out of it with CLINISTIX. You can make him understand that purple means danger – purple colour on the CLINISTIX is visible proof that control is slipping. Good control from the outset is essential if the risk of complications such as retinopathy and nephropathy is to be reduced: the patient who spends a few minutes a week on testing can save years of misery later.

For the insulin dependent diabetic prescribe CLINITEST*. Both CLINISTIX and CLINITEST are prescribable on EC10.

The diabetic's first complication is COMPLACENCY

treat it with CLINISTIX*
THE ROYAL COLLEGE OF GENERAL PRACTITIONERS

Services provided for members

1. The Geoffrey Evans Library provides lists of references and a photocopying service.
   Librarian: Miss M. Hammond, 14 Princes Gate, London, S.W.7.

2. Medical recording service and sound library
   Honorary directors: Drs John and Valerie Graves, O.B.E., Kits Croft, Writtle, Chelmsford, Essex.

3. Postgraduate Information Diary

4. Practice organization. Library of architects' plans, photographs, descriptions of practice premises and advice on equipment.
   Secretary: Practice Organization Committee, Royal College of General Practitioners, 14 Princes Gate, London, S.W.7.

5. Awards. A number of Travelling Fellowships and prizes are in the gift of the College. Information is published periodically in the College Journal.

6. Research Register, and Register of Research Projects
   Honorary registrar: Dr R. M. Griffiths, 4 The Dell, Woodford Wells, Essex.

7. The Records and Research Advisory Service. Planning and statistical advice and processing for mechanical analysis of survey results or other records. Advice in planning, in contacting like-minded practitioners, advice in method, on any aspect of research work.
   Honorary director: Dr D. L. Crombie, 8 Albert Road, Harborne, Birmingham 17.

8. Epidemic Observation Unit. Collates observations of practitioners which might otherwise be lost.
   Honorary director: Dr G. I. Watson, Corran, Peaslake, nr. Guildford, Surrey.

9. Grants. Grants in aid of research are made from the funds of the Research Foundation. Advice as to other sources of finance for research and help with preparation of applications.
   Honorary secretary/treasurer: Dr E. V. Kuenssberg, 15 Warriston Crescent, Edinburgh 3 (or to 14 Princes Gate, London, S.W.7).

10. College Club. All members of the College are ipso facto members of the club at 14 Princes Gate, S.W.7, where bed and breakfast may be obtained at reasonable rates, and where members may meet friends. Members may, subject to approval, hire rooms for functions and meetings.
    Administrative secretary: Mrs E. Phillips, Royal College of General Practitioner, 14 Princes Gate, London, S.W.7.

11. Journal. Published monthly and circulated to all members and associates. Subscription to non-members, £4 4s. 0d. per annum.
    Honorary editor: Dr R. M. S. McConaghey, O.B.E. Prospect House
    Editorial manager: Miss I. Scawn

Other Publications
The Journal of the Royal College of Physicians of London

This Journal provides a commentary on all matters relevant to the art and science of the physicians. It is concerned with the evaluation of all the growing points of medicine and is not confined to the mere recording of experimental protocol. It should be required reading, complementary to the specialised journals, for all who are members of a learned profession. Much of the material published is derived from the college conferences in which recent advances are woven into the fabric of medical practice by experts who present their work to a general audience and have to indicate the importance of their specialty to workers in other fields, thus leading to fruitful collaboration and new ideas.

ACCOMMODATION AT COLLEGE HEADQUARTERS

Temporary residential accommodation for members and associates and their families is provided at college headquarters. This building, overlooking Hyde Park on one side and Princes Gate on the other, is central and easily accessible.

The charges, including breakfast, are as follows:
For single rooms £2 10s. 0d. per night
For double rooms £4 5s. 0d. per night
For a flatlet (bed-sitting room for two, bathroom and dressing room) £6 per night or £36 per week
For a self-contained flat (double bedroom, sitting room, hall, kitchen and bathroom) £42 per week

Children under the age of 12 years cannot be admitted, and dogs are not allowed.

Members and associates may, subject to approval, hire the reception rooms for meetings and social functions. The charges for these are:

Long room (will seat 100) 25 guineas for each occasion
Damask room (will seat 50) 15 guineas for each occasion
Common room and terrace 15 guineas for each occasion

A service charge of 10 per cent is added to all accounts to cover gratuities to domestic staff.

Enquiries should be addressed to the Administrative Secretary, The Royal College of General Practitioners, 14 Princes Gate, London, S.W.7. (Tel. 01-584 6262). Whenever possible bookings should be made well in advance.
