Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else’s. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That’s why it’s so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we’ll find the policy which will work hardest for you.

Do it now.

A case for ‘Neulactil’

The antisocial adolescent. The problem child. The difficult geriatric patient. Each a specific type of behaviour disturbance, calling for specific management methods.

Sedatives and tranquillisers can help, but more valuable still are compounds with greater specificity of action, particularly in controlling such symptoms as impulsiveness and aggressive tendencies. ‘Neulactil’ is such a compound.

‘Neulactil’ has been shown to be highly effective in the control of disordered behaviour in juvenile, adolescent and elderly patients, whether it is of the neurotic type, or associated with psychotic illness.

“The manufacturer’s claims that this drug is a potent neuroleptic are justified.”

*Neulactil*® brand pericyazine is available as tablets of 2.5 mg., and 10 mg., syrup 2.5 mg. and 10 mg. per 5 ml., injection solution 10 mg. per ml.

ROTER IN PEPTIC DISORDERS

does more than just relieve pain

ROTER tablets quickly overcome the pain and discomfort of minor gastric disturbances, but their true value is most evident in their control and frequent healing of peptic ulcer in both the early and the advanced or chronic stages. With Roter therapy, hospitalisation or surgery is mostly avoided; the patient remains ambulant and uncommitted to a restricted or prescribed diet; and recurring medical attention is usually obviated. Roter is worth remembering for your "gastric" patients.

Each tablet contains: Bismuth Subnitrate Roter (350 mg.), Magnesium Carbonate (400 mg.), Sodium Bicarbonate (200 mg.) and Cortex Rhamni Frangulae (25 mg.).

Packings: Tins of 40 and 120, also dispensing sizes, 360 and 720 (P.T. exempt).

Literature will be supplied on request from:-

In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles ... the dangers inherent in straining ... refusal to co-operate ... the presence of pain, to which anal fissures or haemorrhoids may contribute ... the need for enemas and suppositories ... the risk of faecal impaction, with consequent manual removal ...

Dorbanex can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. Dorbanex produces a soft but well-formed stool without gripping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

...have a straightforward solution

Now available in three forms—25 capsules and in two strengths of liquid—Dorbanex provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, Dorbanex prepares the way for pain-free evacuation.

DORBANEX CAPSULES: each contains 1:8-dihydroxyanthraquinone 25 mg., poloxalol 200 mg. DORBANEX LIQUID: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg., poloxalol 200 mg. DORBANEX FORTE: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 75 mg., poloxalol 1000 mg.

Dosage DORBANEX CAPSULES: Adults, one or two capsules. Children, one capsule. DORBANEX LIQUID: Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery: two to four teaspoonfuls or two to four capsules. DORBANEX FORTE: one teaspoonful, or as directed by the physician. Treatment should be taken at bedtime. Contra-indications In common with other gastro-intestinal evacuants, Dorbanex should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. Side-effects Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients.

Basic NHS Prices Dorbanex Capsules: bottles of 30 capsules 8/-; Dorbanex Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 20/-; Dorbanex Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/-. Additional information on request.

A UNIQUE ORAL GEL
WITH STRIKING ANALGESIC AND
ANTISEPTIC PROPERTIES

Bonjela has been shown in formal
American trials to bring rapid relief
from pain in 90% of all cases of oral
ulceration, herpes labialis, gingivitis
and denture sores. By rapid relief is
meant marked alleviation of pain
within 2-3 minutes.

Bonjela also promotes healing
whenever the aetiology is partly or
wholly bacterial. Some ulceration
originates from endocinal, viral or
fungal causes which may require
other forms of treatment.

Even in these cases where a bac-
terial element is superimposed on the
original infection Bonjela will reduce
the severity of the infection and rapid
relief from pain will be obtained.

FORMULA: Choline Salicylate
8.7%, Cetalkonium Chloride 0.1%
Alc. (95%) 39.0%, Menthol 0.057%
Glycer 4.6%.

INDICATIONS: Herpes labialis,
gingivitis, oral ulcerations, cheilosis
denture sores, infant teething dis-
orders.

PRESENTATION: Bonjela is avail-
able in 10 g. tubes at a basic N.H.S.
cost of 2/8d. per tube.

GOLF

It was the Scots who brought the game of golf to its greatest flowering, and it is the Royal and Ancient Club of St. Andrews which is supreme arbiter of the game today. It is they who lay down the rules, including the one, for instance, that says that the weight of the ball shall be not greater than 1.620 ounces avoirdupois and the size not less than 1.620 inches in diameter.

TRANSVASIN

Patients suffering from rheumatic symptoms obtain rapid relief with this well-proven and economical medication. The esters of nicotinic, salicylic and aminobenzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a valuable adjuvant in the treatment of osteo- and rheumatoid arthritis.

CONTAINS

- Ethyl Nicotinate ........................................ 25%
- Hexyl Nicotinate ........................................ 20%
- Tetrahydrofurfuryl Salicylate ........................ 15%
- Ethyl Aminobenzoate .................................. 7%
- Base ........................................................... to 100%

The standard treatment for rheumatic symptoms

Just one teaspoonful of PHOLTEX relieves cough for 8 to 10 hourz ZZZZZ

Just a single teaspoonful dose of Pholtex can relieve a cough through the whole of a restful night — or all of a working day. Each teaspoonful of Pholtex contains Pholcodine B.P. 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes in a pleasantly-flavoured thixotropic vehicle. Dosage: one 5 ml. teaspoonful two to three times a day (for children, half to full adult dosage according to age). Basic NHS cost: 100 ml., 8/–; 1000 ml., 79/4. Full information is available on request.

INDOCID

Indomethacin

the sooner the better for optimal results

Through its anti-inflammatory and analgesic activity, 'Indocid' offers many patients:

- significant relief of pain, tenderness and stiffness
- reduction in joint swelling and inflammation
- increase in mobility and function
- the possibility of concurrent steroid dosage being reduced or even discontinued

'Indocid' is suitable for long-term therapy where necessary

Supplied as 25 mg capsules, 100 mg suppositories, and a suspension (25 mg/6 ml).

Detailed information is available to physicians on request.

® denotes registered trademark

Merck Sharp & Dohme Limited, Hoddesdon Hertfordshire Telephone, Hoddesdon 67123
now, for the first time a clinically proved appetite stimulant

'Periactin' induces a marked improvement in the appetite of many patients. The resulting weight gain is due only to the increased food intake—there is no disturbance of endocrine function, no evidence of fluid retention.

'Periactin' does not reproduce the effects of 'tonics', haematinics or vitamins. 'Periactin' acts promptly, and its dosage is simple.

'Periactin' will be invaluable for many of those situations in which patients, adults and children, require food and yet have no appetite for it.

Supplied as tablets containing the equivalent of 4 mg anhydrous cyproheptadine hydrochloride, and as a syrup containing the equivalent of 2 mg anhydrous cyproheptadine hydrochloride in each 5 ml. Detailed information is available to physicians on request. ® denotes registered trademark.

'Periactin' is also established as an antihistamine for allergic conditions.

Diabetics who need these need CLINISTIX too!

When you prescribe diet and oral hypoglycaemic agents, add 'CLINISTIX strips' to the prescription. Non-insulin dependent diabetics need to check regularly that their diabetes is controlled. Tests for glycosuria with CLINISTIX reagent strips can be made by practically all patients and take only 10 seconds to perform.

Whenever oral hypoglycaemic agents are prescribed remember 'control' and add CLINISTIX strips to the prescription. And of course, insulin-dependent diabetics should test regularly with CLINITEST* reagent tablets. CLINISTIX reagent strips and CLINITEST reagent tablets are prescribable on NHS form EC10. Further information on testing patterns available on request.

In the treatment of ulcers and burns, or in any skin condition open to infection...

It's as easy as ABC to use doubly-interleaved **intertulle fucidin**

Each square slides easily from the pack; dressings no longer stick together. There is no waste. A tulle square is cut to the size you need, the protective interleaving is peeled away and the dressing applied to the lesion. The remaining protective sheet is removed and dressing is completed as required. Intertulle Fucidin has the bactericidal power of Fucidin Ointment against staphylococci and streptococci and remarkable freedom from side-effects.

Intertulle Fucidin is presented in special white plastic packs containing 10.4" x 4" sterile gauze squares, doubly-interleaved for easy use and impregnated with Fucidin Ointment (2% Sodium Fusidate B.P. in a neutral ointment base) – the logical topical antibiotic.

Now available on E.C.10

**a case in point:** *Left*: Varicose ulcer on leg of 74 year-old man.  
*Right*: After 5 weeks' treatment with Intertulle Fucidin.  
*Photographs from Leo Laboratories' Library of British Dermatological Case Histories, 1969.*
