Prevent breakthrough hyperacidity

When your patient presents with symptoms of gastric hyperacidity, Nulacin therapy provides continuous neutralisation—essential for the prevention and healing of peptic ulcer since most peptic ulcers arise and recur in the presence of free acid.

The Nulacin tablet is prepared from whole milk combined with dextrins and maltose, together with magnesium trisilicate 230 mg., magnesium oxide 130 mg., calcium carbonate 130 mg., magnesium carbonate 30 mg., OI. Menth. Pip. q.s.

Butazolidin® Alka mantle tablets

A new approach to the treatment of patients with a known gastric sensitivity to antirheumatic agents

Butazolidin® Alka is formulated as a mantle tablet, incorporating 500 mg of a dried aluminium hydroxide gel B.P., 1000 mg magnesiumrotate B.P. around the central core of 500 mg Butazolidin®

Great (U.K.) Limited
Pharmaceuticals Division
Macclesfield, Cheshire
Duphar laboratories concentrate all their resources and efforts on just four fields of medicine.

Gastroenterology, Obstetrics and Gynaecology, Cardiovascular and Respiratory Pathology are the areas in which Duphar, the UK associates of an international organisation, have chosen to deploy their resources. Duphar products are marketed in the knowledge that they are born of thorough investigation and exhaustive research. Since Duphar concentrate their efforts on a small range, the medical profession can be sure that any product released represents an advance in a specialised field.
Itching for sleep?

Urticaria is often at its worst at night-time. Pro-Actidil® taken in the evening, brings relief during the night and with its sustained antihistamine effect goes on working during the next morning and afternoon.

The three-layered Pro-Actidil presentation is effective in the treatment of allergic dermatoses especially if associated with urticaria, angioneurotic oedema, seborrhoeic eczema, pruritus, allergic asthma, and vasomotor rhinitis.

Pro-Actidil tablets each contain 10 mg triprolidine hydrochloride. Also available: Actidil® tablets, each containing 2.5 mg triprolidine hydrochloride (useful for daytime use and when a short duration of action is required), and as Actidil Elixir containing 2 mg in each 5 ml.

Full information is available on request.

Molecular roulette is not Duphar’s game

Duphar research aims solely at the development of original molecular structures which represent therapeutic advances. Before we develop any product we must be assured that it will fill a definite gap in the therapeutic armamentarium. By adhering to this policy Duphar have succeeded in making their contributions to four carefully selected fields of medicine—gastroenterology, obstetrics and gynaecology, cardiovascular and respiratory pathology. In these areas we have acquired depth of knowledge and expertise—and it is to these areas that we will continue to devote the major part of our resources.

flu can be a killer

Influvac can save lives

High Risk
"Flu can be a life-threatening infection in patients with chronic or debilitating disease. The danger is that 'flu will be succeeded by secondary infection such as pneumonia. It is in those patients whose resistance is already compromised by pre-existing disease that the mortality is highest. This is why health authorities in many countries now strongly recommend that such high-risk patients be protected against 'flu by routine vaccination.

Prophylaxis
Patients with chronic heart and lung conditions and those in the age group 50+ must be protected from the 'flu viruses. Prophylactic immunization is the only effective measure. Mortality from influenza may be reduced dramatically by routine vaccination.

Influvac
Influvac is a potent, highly purified, aqueous vaccine containing inactivated influenza virus. It confers a maximal degree of protection against the same or closely related strains of influenza virus as those included in the vaccine. The amount of antibody formation is quantitatively related to the amount of antigen in the vaccine. There is a limit to the amount of antigen necessary for optimal antibody formation so that more antigen will not increase the antibody titre. Influvac contains this maximum, distribution over those strains that are likely to circulate in the coming season. Thus it offers the best possible protection. Vaccination produces a maximum level of antibodies within approximately two weeks. The period of immunity may extend to 12 months, but is at least 6 months. Injections of Influvac are almost painless due to its high purity and to the fact that the virus has been inactivated by means of β-propiolactone instead of formaldehyde. Local or general reactions after inoculation are rare, since Influvac contains a minimal amount of protein (measured as nitrogen).

Presentation and Basic N.H.S. Prices
Influvac D.S. 1 ml. (Cartrix Disposable Syringe) 12/-.
Influvac 1 ml. ampoule 10/-.
Influvac 10 ml. multi-dose vial 80/-.
Influvac 100 ml. multi-dose vial 700/-.
Influvac administered by hypodermic jet injection team (per dose) 12/6.

The world is Duphar's library

To uphold the standard of selective medical research, Duphar collects informed opinion from all over the world. This accumulation of knowledge covers a wide range since depth of information is the keynote of Duphar philosophy. The link which we establish between our research team and the medical profession is no less informative, but it concentrates on just four selected fields—gastroenterology, obstetrics and gynaecology, cardiovascular and respiratory pathology.

Migril masters migraine

Stops headaches. Stops nausea.

Ergotamine — specific for the early control of the headache and ocular disturbances — may also aggravate the nausea and vomiting of migraine. By the inclusion of cyclizine in MIGRIL, any tendency to nausea and vomiting, due to the full therapeutic dose of ergotamine, or the migraine itself, is averted.

Each tablet contains 2 mg ergotamine tartrate, BP, 50 mg cyclizine hydrochloride, BP and 100 mg caffeine hydrate, BP. Full information is available on request.
And what of the future?

What can you expect of Duphar in Britain? You can expect a continued flow of genuinely useful drugs resulting from original research. You can expect a particularly high standard of service from our medical personnel and representatives. It is their function to give you objective information on Duphar products: Influvac for the prevention of influenza, Duphalac and Colofac for intestinal disorders, Duvadilan for the symptoms of growing old and Duphaston for the problems of abortion and dysmenorrhoea. Our products, our information systems and our specialised knowledge are always available to you.

It pays
to have a good insurance company

We all want something different, especially if investment is to be combined with protection. Therefore, it pays to have a good insurance company and a good insurance broker to advise on the choice of that company. For members of the medical and allied professions, the obvious choice is the M.I.A. with over 60 years' broking experience.

dramatic disappearance of bronchitis pathogens

"... a combination of trimethoprim and sulphamethoxazole provided effective prophylaxis in chronic bronchitis. It dramatically diminished sputum volume, rendered it mucoid and abolished pathogens.""

This combination, available as SEPTRIN®, swiftly eradicates a wide range of organisms including the pathogens common in bronchitis—H. influenzae, Pneumococci and Klebsiella sp.

SEPTRIN® has been compared in a trial with ampicillin in treating exacerbations of chronic bronchitis. SEPTRIN® produced a significantly greater reduction in sputum volume and of sputum purulence and the trial also showed that SEPTRIN® produced a better overall clinical response in the bronchitic patients.¹

SEPTRIN Tablets, SEPTRIN Paediatric Suspension and SEPTRIN Paediatric Tablets contain trimethoprim and sulphamethoxazole.

Septrin—an advance on the antibiotics
Normax takes the strain out of constipation

..and promotes comfortable evacuation

Normax is indicated for the treatment of constipation particularly in conditions where it is important that your patients should not strain to stool—coronary thrombosis, cardiac failure, haemorrhoids, episiotomy. Normax has also been used in the treatment of constipation of pregnancy, and in preparation of patients for surgical and radiological procedures. Normax is also indicated for geriatric patients and for patients with spastic colon and diverticulitis.

Composition Each brown capsule contains dioctyl-sodium sulphosuccinate 60 mg., a faecal softener, and 1-8 dihydroxyanthraquinone 50 mg., a mild peristaltic stimulant.

Side Effects No adverse side effects have been reported with Normax. 1-8 dihydroxyanthraquinone may however give the urine an orange tint.

Normax is a registered trade mark

Dosage One to two capsules to be taken at night, or as prescribed.

Presentation & Basic N.H.S. Price Normax capsules are available in bottles of 30 and 250 at a basic N.H.S. price of 4/10 and 26/10 respectively.

Brentford, England
treated by further recompression to the depth at which the symptoms are fully relieved. It may also be necessary to catheterize the bladder, to give intravenous fluids or to perform a pleurocentesis. When the patient has derived maximum benefit from recompression and has reached atmospheric pressure once again it is essential that he remains in the immediate vicinity of the chamber for up to 24 hours so that he may be promptly recompressed if trouble recurs.

A patient who has had even the mildest of symptoms suggestive of decompression sickness should not dive for at least another five days. If he has had neurological decompression sickness or pulmonary barotrauma he should be advised that he must give up diving and seek some other sport. If any neurological symptoms or signs persist after treatment it is a reassuring feature of decompression sickness that continued improvement can be expected for some months.

ACCOMMODATION AT COLLEGE HEADQUARTERS

Temporary residential accommodation for members and associates and their families is provided at college headquarters. This building, overlooking Hyde Park on one side and Princes Gardens on the other, is central and easily accessible.

The charges, including breakfast, are as follows:

For single rooms £2 10s. 0d. per night
For double rooms £4 5s. 0d. per night
For a flatlet (bed-sitting room for two, bathroom and dressing room) £6 per night
or £36 per week

For a self-contained flat (double bedroom, sitting room, hall, kitchen and bathroom) £42 per week

Children under the age of 12 years cannot be admitted, and dogs are not allowed.

Members and associates may, subject to approval, hire the reception rooms for meetings and social functions. The charges for these are:

Long room (will seat 100) 25 guineas for each occasion
Damask room (will seat 50) 15 guineas for each occasion
Common room and terrace 15 guineas for each occasion

A service charge of 10 per cent is added to all accounts to cover gratuities to domestic staff.

For the convenience of members, four car ports, outside 14 Princes Gate, have been rented by the College and may be hired, at a cost of 10s. 6d. per 24 hours.

Enquiries should be addressed to the Administrative Secretary, The Royal College of General Practitioners, 14 Princes Gate, London, S.W.7. (Tel. 01-584 6262). Whenever possible bookings should be made well in advance.
Micoren Capsules

Micoren Capsules act on the respiratory centre to help your bronchitic patient breathe more effectively by:
- increasing the depth of respiration
- improving gaseous exchange
- reducing high blood PCO₂ levels

A big step for the bronchitic with hypoventilation

Geigy

it's wrong to assume that bats are blind.

Most bats are mostly nocturnal in their habits and not blind. They can see quite well, but when they come out in daytime the glare of the daylight distracts them a great deal. But blind bats?

No... just another false assumption.

It is just as wrong to assume, as many people do, that a negative test for protein in urine, by standard methods, excludes the possibility of a significant haematuria. LABSTIX reagent strips avoid the need for assumption, they provide information on the presence or absence of urinary glucose, protein, ketones and blood, together with an indication of urinary pH. This test has now become established as a routine in many wards, clinics and surgeries throughout the United Kingdom.

Facts are more reliable than assumptions. Let LABSTIX provide the information in 30 seconds.

LABSTIX* for earlier diagnosis and effective follow-up

Further information is available on request.

Ames Company

two complementary antihypertensive agents in one tablet

For many hypertensive patients, ‘Hydromet’ may be the most convenient treatment. ‘Hydromet’ contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the treatment of hypertension.

‘Hydromet’ offers the patient these advantages:

- the convenience of a single tablet
- satisfactory control of blood pressure usually possible on a lower dosage of methyldopa
- in some severe and resistant cases, a greater antihypertensive response than with methyldopa alone
- the diuretic action of hydrochlorothiazide, of additional value when hypertension is complicated by heart failure and oedema

‘Hydromet’ is available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP.

Detailed information is available to physicians on request.

‘Hydromet’ and ‘Aldomet’ are registered trademarks.

Merck Sharp & Dohme Limited
Hoddesdon, Hertfordshire
Telephone, Hoddesdon 67123
The place of chlormadinone acetate in contraception should be as an elegant, more dependable, and safer alternative to mechanical means.

**normemonon**

extends the scope of oral contraception to:

* patients with varicose veins, liver disorder or other conditions where oestrogen may be contra-indicated.

* patients intolerant to existing oral contraceptives e.g. those who experience troublesome side-effects such as weight gain, depression, headache or nausea.

* patients wishing to space their families e.g. the mother with one child for whom the maximum reliability of combined oral contraceptives (e.g. Norinyl-1) is not essential.

* patients with reservations about the pill who will be re-assured by "the reduced biological effect" of Normemonon.

Reliability and suitability of Normemonon
The contraceptive protection given by Normemonon is less than that of "combined" oral contraceptives (e.g. Norinyl-1) and better than that of the I.U.D.* For patients who cannot use an oestrogen-containing oral contraceptive, Normemonon provides the most reliable alternative form of contraception.

Each tablet contains 0.5 mg chlormadinone acetate; available in a specially-designed calendar wallet holding 42 tablets (SIX weeks' supply).

SYNTEX  Full prescribing information available from: Syntex Pharmaceuticals Ltd., St. Ives House, St. Ives Road, Maidenhead, Berkshire
CLASSIFIED ADVERTISEMENTS

PARTNERSHIP OFFERED in expanding area by full-list single-handed G.P. who needs to off-load in order to devote some time to teaching. High income, New Town N.H.S. but “personal relationship” practice in Rural County with excellent Post-Graduate Centres, Clinical Assistantships, Rota etc. Sophisticated premises and equipment. Applicant must share the aspirations of the College. Box No. 103, The Journal of the Royal College of General Practitioners, 104, Gloucester Place, London W.1.

YOUR CHANCE to join two young partners in well organised semi-rural practice. Excellent terms and conditions to the right applicant. Full details by return. Dr C. B. Everett, ALTON, Hants.

ANNOUNCEMENT

Each month a section of the Journal will be allocated for classified advertisements from those wishing to obtain partners, assistants or trainees.

The charge for this service is 3s. 0d. per line, plus 2s. 6d. if a Box Number is required.

Advertisers will be invoiced following publication of the Journal, therefore, remittance with advertisements is unnecessary.

Advertisements should be addressed to: The Journal of the Royal College of General Practitioners, Classified Advertisement Department, 104 Gloucester Place, London W1H 4AE.

It's as easy as ABC to use doubly-interleaved intertulle fucidin

Each square slides easily from the pack; dressings no longer stick together. There is no waste. A tulle square is cut to the size you need, the protective interleaving is peeled away and the dressing applied to the lesion. The remaining protective sheet is removed and dressing is completed as required. Intertulle Fucidin has the bactericidal power of Fucidin Ointment against staphylococci and streptococci and remarkable freedom from side-effects.

Intertulle Fucidin is presented in special white plastic packs containing 10, 4" x 4" sterile gauze squares, doubly-interleaved for easy use and impregnated with Fucidin Ointment (2% Sodium Fusidate B.P. in a neutral ointment base) — the logical topical antibiotic.

Now available on E.C.10

a case in point: Left: Varicose ulcer on leg of 74 year-old man.
Right: After 5 weeks’ treatment with Intertulle Fucidin.
