The Beecham Penicillins

Beecham research has produced an outstanding range of semi-synthetic penicillins including:

Penbritin* (ampicillin)  Floxapen* (flucloxacillin)
Orbenin* (cloxacillin)  Pyopen* (carbenicillin)
Celbenin* (methicillin) Broxil* (phenethicillin)
Ampiclox* (ampicillin and cloxacillin)

BRL also produce Maxolon*(metoclopramide) — a modifier of gastric motility.

Full information on all products is available on request.

In anxiety/depression

when sleepless nights follow anxious days,

**Surmontil acts in two ways**

First: Its anxiolytic action produces rapid restoration of normal sleep rhythms, and a subjective improvement in the patient.

Then: Its powerful antidepressant action produces mood elevation, usually within seven to ten days.

**Surmontil Capsules 50 mg**

1 or 2 nocte

control depression and its major symptoms, sleep disturbance and anxiety

PRO-ACTIDIL
in allergies up to 24 hour control
Angina Pectoris: There's no need to give up.

There is a stage in the development of angina when the patient is suffering more and more attacks and is consuming an ever-increasing amount of trinitrin.

But there is still no need for the patient— or his doctor—to give up.

It is in just this situation that 'Inderal' can be so helpful.

'Inderal' gives the heart continuous protection against the effects of physical or emotional stress.

Because the heart has less unproductive work to perform, it needs less oxygen.

The balance between myocardial oxygen demand and the supply from diseased coronary arteries becomes more favourable.

 Attacks are fewer, capacity for exercise is substantially improved and lost confidence is regained.

Even in severe angina there is no need to give up.

There is irrefutable evidence from 21 double-blind trials to show that 'Inderal' helps make life worth living again.

Detailed information, available on request, should be consulted before prescribing.

Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

Full information is available on request. The Technical Services Department, Fisons Limited - Pharmaceutical Division, Loughborough, Leicestershire.

arthritic

For many patients afflicted by arthritic pain at night, ‘Indocid’ Suppositories can bring about a noticeable improvement. A suppository at bedtime usually results in a better night’s sleep, less interrupted by pain and stiffness. These patients find it easier to get started in the morning, and ‘Indocid’ Capsules can help to keep them more mobile during the afternoon and evening.

Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire Telephone Hoddesdon 67123
ON ANNAPURNA the members of the British Nepalese Army Expedition chose Transvasin to relieve muscular pain. Three British climbers used it:

“One suffered badly strained back and chest muscles following involvement in an avalanche. The second developed severe intercostal fibrositis, and the third had badly bruised himself after falling 30 feet and jamming in a crevasse. Transvasin gave considerable relief to all three climbers.”

Personal communication, 3rd September 1970.

Transvasin was also used with great success by many other members of the party who complained of various other aches and pains.

The summit of Annapurna 8000 metres high, was reached on 20th May 1970, by Owens and Day of the British Nepalese Army Expedition. During the 3-hour climb from Camp 5 at 7400 metres, oxygen breathing apparatus was used. The only previous ascent, by Herzog and Lachenal in 1950, took 6 hours. They had no oxygen and suffered severe frostbite, losing all their toes and Herzog his hands. The temperature at the summit for Owens and Day was —30°F.

IN GENERAL PRACTICE too, Transvasin provides effective relief from muscular and rheumatic pains. It contains esters of nicotinic and salicylic acids which ensure a rapid hyperaemic and analgesic effect.

Available in 30 g. tubes.
Basic NHS price 12½p, plus P.T.
Full information is available on request.
Lloyd-Hamol Ltd., London W.1

Transvasin – always in action against muscular and rheumatic pain
Latest research suggests unique action of Negram

Penicillins and Cephaloridine weaken the cell wall. This may kill the bacteria by removing their outer defences. But it can – and often does – result in the survival of L-forms.¹ ¹

Only Negram destroys bacterial DNA, the basis of all bacterial life! DNA controls the whole structure and function of bacteria. For cells to divide and multiply, the DNA must replicate itself. It is at this point that Negram attacks. It prevents the replication of DNA. This fundamental disruption of the control element not only prohibits the proliferation of bacteria but destroys the complete bacterial system.²

Sulphonamides, Trimethoprim and Nitrofurantoin block the metabolic pathways. Each of these antibacterials blocks only one specific step in the process. Very often these particular steps can be by-passed without detriment to the bacteria.¹

Tetracyclines and Chloramphenicol affect the ribosomes. Though the ribosomes are the 'assembly plants' of the cells, their function is controlled by DNA. Unless this control is knocked out, the cell functions are never completely destroyed.²

Clin. Trials J.,
Negram Tablets

Formula: Each tablet contains 500 mg. nalidixic acid.
Adult Dosage: For acute infections, 2 tablets q.i.d. for
at least 7 days, reducing to 1 tablet q.i.d. for chronic infections.
Basic NHS Cost: (2 q.i.d.) 29p a day. Availability: Containers of 56 tablets.

Negram Suspension

Formula: Each 5ml spoonful contains 300 mg. nalidixic acid.
Paediatric dosage: 1 ml. Suspension (60 mg.) per kg. body weight (25mg./lb.) daily for at least 7 days.
For children of average weight and development:
1 month-1 year 2.5 ml. (150 mg.) 2-4 times daily; 1-2 years: 5 ml. (300 mg.) 2-3 times daily
2-6 years: 5 ml. (300 mg.) 3-4 times daily; 6-14 years: 10 ml. (600 mg.) 2-4 times daily
Basic NHS Cost: (5 ml. t.i.d.) 9p per day.
Availability: Bottles of 150 ml. and 500 ml.

Side Effects:
Gastro-intestinal or subjective visual disturbances may
occur but are readily reversible on reduction or discontinuation of therapy.

Precautions.
Use with caution in patients with liver disease and raised intracranial pressure.
Patients should avoid excessive exposure to sunlight. Possible risks should be carefully
weighed against benefits in the first trimester of pregnancy.
Not recommended for infants less than 1 month old.

Fortral

Fortral Injections
contain 30 mg. pentazocine per ml. as the lactate
Dosage
1 – 2 ml. (30-60 mg.) dependent on the severity of the pain,
repeated every 3 to 4 hours as required.
For children the maximum single dose is based on 1 mg./kg. body weight i.m. or s.c.
and on 0.5 mg./kg. body weight i.v.
Basic N.H.S. Cost: 10 x 1 ml. ampoules £1.30 10 x 2 ml. ampoules £1.97

Fortral Capsules
contain 50 mg. pentazocine hydrochloride
Dosage
The usual adult dosage is one or two capsules 3-4 hourly, preferably after meals.
Basic N.H.S. Cost: 50 capsules £1.77

Fortral Tablets
contain 25 mg. pentazocine hydrochloride
Dosage
Usually two tablets (50 mg.) four hourly after meals,
adjustable within the range of 1-4 tablets 3-4 hourly.
Children aged 6-12 years may be given one tablet every 3-4 hours.
Basic N.H.S. Cost: 100 tablets £1.66

Side Effects
Dizziness, nausea, vomiting and headache sometimes occur,
but these side effects tend to decrease after a few doses.
Isolated cases of psychotomimetic effects and of dependence have been reported.

Precautions
Caution in severe renal, hepatic and respiratory impairment, in patients
receiving MAO inhibitors, and in those previously on large doses of narcotics.
Ambulatory patients should not drive or operate machinery. As with all recently introduced drugs
Fortral should be given with caution in the first trimester of pregnancy.

Contraindications
Established respiratory depression. Raised intracranial pressure.
Severe head injury or pathological brain conditions. Convulsive disorders.

Negram and Fortral are registered trade marks.

Fucidin H Ointment First

Whenever a topical antibiotic/steroid preparation is indicated.
Combines the proven antipruritic/anti-inflammatory action of hydrocortisone with the rapid, bactericidal action of Fucidin.
In view of the mounting concern about the adverse effects of the more potent steroids and the proven clinical effectiveness of Fucidin H Ointment in the treatment of a variety of common dermatoses, "... there would seem to be no case for the use of a more potent steroid until hydrocortisone has been first tried."

Available in packs of 10g and 25g.
