THE PURELY BRITISH DEFENCE AGAINST PREVALENT STRAINS OF FLU

‘Influenza remains probably the most important uncontrolled infectious disease in Britain.’

Yet a high measure of prevention can be achieved with a single injection of ADMUNE GB1160, now reformulated and containing a more effective dosage.

‘Vaccines have to be changed periodically . . . to accommodate the shifts and drifts in the antigens of the natural virus . . . an injection of a modern killed influenza vaccine will usually protect 70-80% of those vaccinated.’ ibid.

ADMUNE GB1160 is such a vaccine, made by the most advanced methods, and it offers protection against both the new Scotland and the Port Chalmers A Strains, as well as the Hong Kong B Strain.

‘An annual injection is justifiable for persons in whom an attack of flu might be especially hazardous—those with chest disease, for example, and elderly persons in institutions . . . a more rational policy for industry may prove to be the vaccination of those key workers among whom even a small increase in absence may be critical.’ ibid.

An ADMUNE GB1160 immunisation programme can alleviate the additional strain on a practice during an influenza outbreak, and it can significantly reduce the chance of hospital admissions among older people.

All good reasons for protecting your patients with

New formula

ADMUNE GB1160

The purely British flu vaccine

Each 0.5 ml dose contains:
A/Scot/840/74 (H3N2) 400 I.U.
A/PG/73 (H3N2) 400 I.U.
B/HK/8/73 380 I.U.

John died last week from ischaemic heart disease—
Now his immediate family is your concern

Ischaemic heart disease now causes more than 25% of all deaths in the United Kingdom.¹

Patients with familial hypercholesterolaemia (Type II) are particularly at risk. Moreover, the family and relatives of affected individuals are also prone to premature death from IHD.²

Prompt identification and treatment offer the only opportunity to prevent early onset of the condition.³ The most significant therapeutic advance is Questran.³⁴ Questran restores the normal lipid balance, reducing plasma cholesterol by as much as 40%.³ In this respect Questran is superior to Clobifibrate.⁴

Questran

Restores lipid balance and protects your patients at risk from IHD

Have you seen the Amoxil difference?

Recent microscopic studies have provided further explanation of the outstanding clinical success of Amoxil. They showed clearly that Amoxil produced more rapid bacterial cell death than other antibiotics.

Clinical features reported in numerous studies on Amoxil include faster absorption, higher urinary concentrations, and better penetration through bronchial membrane barriers; all contributing to the greater clinical success achieved with this antibiotic. In fact, the Lancet concluded recently "Ampicillin (Amoxil) seems to be a genuine improvement on..."

Experience in practice confirms Amoxil's safety and convenience. Amoxil patients benefit from the simple t.d.s. dosage which can be taken with or without food. In addition, there are very pleasant tasting paediatric syrups. Amoxil, the antibiotic that's currently making all the difference in respiratory, urinary tract and paediatric infections.

<tr>
<th>Schedule A: 3 x 50mg daily</th>
<th>Schedule B: 1 x 150mg daily</th>
</tr>
</thead>
</table>

Theoretically predicted blood-concentration patterns for Ludiomil in man resulting from two different dosage schedules.

Full dosage may be from the start. Ludiomil can be given in two doses a day. The majority of patients require only a single dose at night. However, some patients find this not satisfactory until a suitable bedtime dose has been determined, and then in these situations, two doses at 10 am and 10 pm may be given. 10 mg daily dose of sedative is usually satisfactory.

CIBA Laboratories (Pty) Ltd, Westmead, LD/2
Migril hits migraine right behind the eyes

Migraine attacks often begin with the eyes. MIGRIL, taken at the first warning, prevents the full-blown attack. MIGRIL combines a fast-acting vasoconstrictor with an effective antinauseant. When carrying MIGRIL your patients have a comprehensive treatment for the migraine attack, and are thus spared the anxiety associated with an impending attack.

MIGRIL is the most widely used symptomatic anti-migraine preparation in Britain.

MIGRIL contains ergotamine, cyclizine and caffeine. Full prescribing information is available on request.

For those patients who cannot or will not tolerate bran...

...the best alternative is Normacol!*

A high residue diet with added fibre in the form of unprocessed bran is rapidly being recognised as the most effective treatment for diverticular disease. However, there are patients who cannot tolerate bran or who find it unpalatable. And of course there are always those who will not take something unless it's 'medicine.' For them, the best alternative to bran is Normacol.

Normacol provides the bulk which is necessary to prevent segmentation of the sigmoid colon and effect a lowering of the intracolic pressure. Symptoms can thus be rapidly relieved and bowel habits restored to normal.

Normacol

Normacol Standard brown coated granules containing Sterculia BPC 62% and Frangula BPC 1949 8%
Normacol Special white coated granules containing Sterculia BPC 62% alone
Normacol Antispasmodic orange coated granules containing Sterculia BPC 62% and Alverine Citrate 0.5%
Normacol Diabetic brown coated granules is identical with Normacol Standard except for the absence of sugar

timely release from tea & toast anaemia

'Fesovit' timed release capsules replace iron stores depleted by poor eating habits, and help to meet the daily requirements for essential vitamins B and C. The unique 'Spansule' Capsule is formulated to release the majority of the iron not in the stomach where it can cause gastric irritation but in the duodenum and jejunum where the absorption of iron is optimal.

*This is not a clinical diagnosis. It is merely a convenient and familiar way of describing those anaemias caused by poor eating habits, e.g. a diet made up almost exclusively of tea and toast.

'Fesovit' and 'Spansule' are trade marks. Full information is available upon request. 'Fesovit' contains ferrous sulphate, vitamin B complex and vitamin C.

GENERAL PRACTICE MEDICINE  
Edited by J. H. Barber and F. A. Boddy  
1975 364 pages illustrated  £4.75  
The text of this book is concerned with the way in which illness is presented to the family doctor and the steps that are practical and necessary before a diagnosis can be established and the patient managed in the context of general practice. The book is primarily intended for the young doctor who is beginning a career in general practice although it will also be of interest and value to more experienced doctors. The authors have been selected for their special interest and experience in the subject about which they write, and the material reflects the needs of general practitioners.

SCREENING IN GENERAL PRACTICE  
Edited by Cyril R. Hart  
1975 320 pages illustrated  £5.00  
This is the first medical textbook to deal with screening in a general practice setting. With three exceptions, all the contributors to the 31 chapters are general practitioners in active general practice, with wide-ranging, first-hand experience in the topics of which they are writing. Established screening procedures such as cervical cytology and developmental assessment of young children are evaluated in the light of recent experience, and the possibilities of future computerisation are discussed.

A GUIDE TO COUNSELLING AND BASIC PSYCHOTHERAPY  
Richard Parry  
1975 144 pages  £1.75  
This book is really an account of some of the guidelines used by one man in his psychotherapeutic work. The author recognises that management of psychological problems depends not only on the nature of the problem, but also on the therapist himself, on his own personality and the approach with which he feels most comfortable. In its concentration on the approach, it aims to encourage the reader to consider, dispute or test the suggestions that are made. It seeks thereby to help him to develop an effective therapeutic attitude.

TRAVEL MEDICINE  
A Handbook for Practitioners  
Anthony C. Turner  
1975 260 pages illustrated  £4.25  
Travel Medicine is aimed to bring to light the medical problems of modern travel, particularly to and from warm climates. The first half of the book consists of advice the doctors should give to his patients before they travel. The second half basically covers the differential diagnosis and treatment of the most likely diseases to be brought home by businessmen, holiday makers and immigrants. In addition there are chapters assessing the individual’s fitness to travel by air and to reside in warm climates.
Locum General Practitioner Zambia

A locum general practitioner is required for a ten month period from mid-January to mid-October 1976.

The practice which is in Lusaka, the Capital of Zambia, is organised by a consortium of companies and looks after the health of some 2,300 employees, both Zambian and Expatriate, of these companies.

There is one other doctor and two S.R.N. nurses to assist in the smooth running of the practice which is organised around U.K. lines and fully equipped.

There is access to G.P. beds in the local private nursing home which has full pathological and X-ray facilities and excellent liaison exists between the modern University Teaching Hospital with its post-graduate activities etc. There is minimal night work and no domiciliary obstetrics.

The applicant should either be vocationally trained or an experienced practitioner and a graduate of a U.K. or Zambian university.

An excellent, fully equipped company house with swimming pool and car will be provided free. Three weeks paid leave and recruitment and repatriation air passages for the applicant and his family will be provided by the company.

A very generous salary will be negotiated, dependent on experience and qualification and interviews will be in London in late September 1975. Currency regulations allow one third of gross taxable emoluments to be remitted. Income tax is similar to the U.K.

Apply airmail, with curriculum vitae and names of two referees to:

Dr. M. Bush, Minbank Clinic, P.O. box 209, Lusaka, Zambia, Central Africa.
Deafness.
If you can’t do anything, don’t just do nothing.

There often comes a time when all deaf patients can do is learn to live with it. One of the best things you can do then is introduce them to the RNID. We run a welfare service, an information and library service that is one of the largest in the world to be devoted to deafness, and laboratories with sound measuring equipment.

In fact we can help your deaf patients in many ways. All you have to do is ask.

Perhaps you’d like to see our leaflet ‘What is the RNID?’ Or get some of our publications for your waiting room. They include ‘Clinical Aspects of Hearing,’ ‘Special Aids to Hearing,’ ‘Conversation with the Deaf,’ ‘Highway Code for Children’ and posters on protecting hearing. And you may wish to subscribe to our magazine—Hearing—at £1.00 p.a.

Literature and advice are freely available to you. And the more you know about the RNID, the more you can do for your deaf patients.

The Royal National Institute for the Deaf.

BRITISH MIGRAINE ASSOCIATION

SYMPOSIUM

“Migraine in Childhood”

Royal College of General Practitioners, 14 Princes Gate, London S.W.7.

Saturday, 18th October, 1975

Chairman: Dr Ian Watson

The programme will include papers on the incidence, diagnosis, management and prognosis of migraine in childhood.

There is no registration fee for this Symposium. (Application made for Seniority Payment recognition); and lunch will be provided by the British Migraine Association.

Places are limited so if you would like to receive an invitation please write to Peter Wilson, Hon. Sec. British Migraine Association, Evergreen, Ottermead Lane, Ottershaw, Chertsey, Surrey KT16 OHJ.
WORCESTER

St. John's House, Worcester, has a vacancy on 1 January, 1976, which we hope will prove attractive to a vocationally trained medical graduate.

We are a six partner group, with two additional part-timers, requiring a seventh partner, and we work from a converted Georgian building in a pleasant expanding Cathedral city.

Premises are fully staffed, including practice administrator, nurses and health visitors. We run an appointment system, offer a comprehensive contraception service, have our own E.C.G. and are recognised trainers in general practice.

The partners enjoy an excellent liaison with the local hospitals, where full access to diagnostic facilities is available. There is a thriving postgraduate medical centre and a well run general practice maternity unit.

Accommodation, if required, comprises a spacious, rent-free, two-bedroomed flat, with all modern appointments.

Starting salary and parity to be discussed at interview.

For further details, please apply to Dr S. G. King, St. John's House, 28 Bromyard Road, Worcester.

CLASSIFIED ADVERTISEMENTS

Classified advertisements are welcomed and should be sent to: The Journal of the Royal College of General Practitioners, Longman Group, Burnt Mill, Harlow, Essex.

The charge for this service is 50p per line, plus 25p if a box number is required. Fellows, members and associates of the Royal College of General Practitioners may claim a ten per cent reduction.

The inclusion of an advertisement in this Journal does not imply any recommendation and the Editor of the Journal of the Royal College of General Practitioners reserves the right to refuse or stop the insertion of any advertisement.

Readers are asked to mention The Journal of the Royal College of General Practitioners when replying to all advertisements.

UNIVERSITY OF DUNDEE

Senior Lecturer in the Department of General Practice

Applications are invited for this new post from registered medical practitioners who have had considerable experience in general practice. Applicants should hold the Diploma of M.R.C.G.P.

Salary will be commensurate with the emoluments of Principals in General Practice, with superannuation provision.

Further particulars of the post may be obtained from the Secretary of the University of Dundee, Dundee, DD1 4HN, to whom applications including the names and addresses of two referees should be sent by 30 September 1975. Please quote Ref: EST/73/75.

Opinions expressed in The Journal of the Royal College of General Practitioners and the supplements should not be taken to represent the policy of the Royal College of General Practitioners unless this is specifically stated.
TEACHING PRACTICES

by

Donald Irvine, M.D., F.R.C.G.P.

Reports from General Practice Number 15

One of the most important developments in medical education in recent years has been the introduction of three-year training programmes for general practice. Teaching Practices outlines many of the characteristics of the teachers, and, particularly, the practices where this work is being done.

This is the most detailed and authoritative report on this subject so far published and introduces a new system of scoring teaching practices.

Copies are available now from the Longman Group Ltd., 43–45 Annandale Street, Edinburgh EH7 4AT, Scotland. Price: £1·00 ($3·50).

COLLEGE ACCOMMODATION

Charges for college accommodation are reduced for members (i.e. fellows, members and associates). Members of overseas colleges are welcome when rooms are available. All charges for accommodation include breakfast and are subject to Value Added Tax; a service charge of 12½ per cent is added. Members are reminded that children under the age of 12 years cannot be admitted and dogs are not allowed.

Charges are:
