Amoxil making all the difference to the patient.

And throughout Britain. Because doctors everywhere now recognise the advantages of Amoxil in respiratory infections.

Amoxil ensures faster relief of symptoms for all respiratory patients and longer periods free from infection for the chronic cases.

Three main factors are responsible for this. Firstly, Amoxil is more completely absorbed into serum. Secondly, unlike other antibiotics it penetrates equally well through inflamed and uninflamed bronchial membrane barriers to clear even the most entrenched pockets of infection. And thirdly, extensive studies have shown that Amoxil kills bacteria more rapidly than other antibiotics.

These three factors, together with a trouble-free dosage, contribute to the Amoxil difference which is appreciated by doctors and patients everywhere.

makes all the difference in respiratory infections everywhere.
As broad

as it's strong!

Magnapen

the infection fighter

When treating severe infections you look for decisive therapy. Magnapen provides it—with first-time confidence. Magnapen's broad spectrum activity covers virtually all the bacteria commonly met with in clinical practice. And Magnapen’s bactericidal strength adds a greater certainty of rapid success in difficult cases. All this with penicillin-safety. Prescribe Magnapen first—whenever there is cause for concern.

Full prescribing information on Magnapen* (250mg of both flucloxacillin and ampicillin) for the treatment of severe chest, ENT and skin and soft tissue infections is available on request from:

Beecham Research Laboratories, Brentford, England.
A branch of Beecham Group Limited. regd Pl. 0038/0089, 0090, 0120
A 99.1% chance of success in U.T.I.

The chart above shows the percentage sensitivities of isolates from acute urinary infections against five commonly-used antibacterials. (From an *in-vitro* study involving 173 general practitioners). SEPTRIN was superior to all other oral antibacterials tested, with 99.1% of urinary pathogens sensitive.

For longer action and easier control

The prolonged action of Beta-Cardone has been well documented. Powerful effects are seen as long as 24 to 48 hours after dosing. Accumulation in the body does not occur. Beta-Cardone therefore gives your patient day and night protection against anginal attack.

**Beta-Cardone**

Protection for the heart day and night

The longer-acting beta-blocker

**Beta-Cardone**

*The longer-acting beta-blocker Beta-Cardone offers protection for the heart day and night.*
