Antepsin

Mucoprotective ulcer healer

Non-systemic action

Fast pain relief
Excellent healing rates
Prolonged remission
Low incidence of side effects

Prescribing Information

Presentation Antepsin Tablets 1 gram are white, oblong, biconvex, uncoated tablets scored and embossed 1239 on one side and AYERST on the other. Each tablet contains 1 gram sucralfate. Uses For the treatment of duodenal ulcer, gastric ulcer and chronic gastritis. Dosage and Administration For oral administration. Adults - Usual dose 1 gram 4 times a day. Maximum daily dose 8 grams. Four to six weeks treatment is usually needed for ulcer healing but up to twelve weeks may be necessary in resistant cases. Antacids may be used as required for relief of pain. Contra-Indications, Precautions, Warnings, etc. Contra-Indications There are no known contra-indications. Precautions 1. Concomitant administration with some oral anti-infectives such as tetracyclines may interfere with absorption of the latter. 2. The product should only be used with caution in patients with renal dysfunction. 3. As with all medicines, Antepsin should not be used in early pregnancy unless considered essential. Side Effects A low incidence of mild side effects, e.g. constipation, has been reported.

Half-Inderal LA is an 80mg long-acting formulation of the world's most tried and trusted beta-blocker.

It is especially suitable for older patients who may need a lower than usual dosage level.

In addition, this new once-daily regimen can be used to ease the problem of poor compliance in patients currently taking 80mg in multiple doses.

NEW ONCE DAILY

Half-Inderal LA

80mg propranolol hydrochloride BP in a long-acting formulation.

DOSAGE: Angina, anxiety, essential tremor, thyrotoxicosis, prophylaxis of migraine: 1 capsule "Inderal" LA, once daily, increased if necessary to 1 capsule "Inderal" LA, once daily and a further increment of Half-"Inderal" LA, once daily, increased, if necessary to 1 capsule Half-"Inderal" LA, once daily, and a further increment of Half-"Inderal" LA, once daily, increased, if necessary in increments of Half-"Inderal" LA, in appropriate patients e.g., the elderly, starting dose is 1 capsule of Half-"Inderal" LA, once daily.

Precautions: Untreated cardiac failure. Bronchial asthma. Contraindications of thyroid derangement. Pregnancy. Adverse Reactions: Cold extremities, nausea, insomnia, ascites and diarrhoea are usually transient. In addition, cases of paraesthesia of the hands, rushes and dry eyes have been reported with beta-blockers. Consider discontinuation if they occur. Beta-blockers should be withdrawn gradually. Overdosage: See data sheet. Basic

NHS Cost: 28-day calendar pack, "Inderal" LA £6.99, Half-"Inderal" LA £4.48, One Use, "Inderal" LA £0.29/0.12, Half-"Inderal" LA £0.19/0.07. "Inderal" is a trade mark for propranolol hydrochloride. "Inderal" LA is a trade mark for propranolol hydrochloride in long-acting formulation. 5. Residential Attachments in Obstetrics: two-week attachments throughout the year by arrangement.

Further particulars may be obtained from the Postgraduate Dean, Ninewells Hospital and Medical School, Dundee DD1 9SY.
DOCTORS TALKING TO PATIENTS

Doctors talking to patients, by Professor P. S. Byrne, a distinguished past-President of the Royal College of General Practitioners, and Dr B. E. L. Long, an expert educationalist, was first published by HMSO in 1976.

This well known book has made a major contribution to the understanding of the consultation in general practice and illustrates the potential for using modern methods of recording for analysing the problems of doctor-patient communication.

With permission of HMSO, the Royal College of General Practitioners has now reprinted Doctors talking to patients and so made available this classic work to a new generation of trainees and general practitioner principals.

Doctors talking to patients can be obtained from the Publications Sales Office, Royal College of General Practitioners, 8 Queen Street, Edinburgh EH2 1JE, price £10.50, including postage. Payment should be made with order.

A HISTORY OF THE ROYAL COLLEGE OF GENERAL PRACTITIONERS
The First 25 Years

This book records early attempts to form a College, the birth of the College itself, and the story of its growth through childhood to maturity. Edited by three distinguished founder members, John Fry, Lord Hunt of Fawley and R.J.F.H. Pinsent, it is a fascinating tribute to the enthusiasm, persistence and dedication of the men who made the College.

Written by those who were actually involved in its development, the chapters describe not only the story of the structure and organization of the College as a whole but of each of its component parts. Thus its involvement with medical education, standards, research and literature is described as well as relationships with other bodies at home and abroad—and a glimpse into the future.

Undoubtedly a success story, this account of the first 25 years of the College is recommended to those interested not only in the College but in the evolution of general practice itself. Copies can be obtained from the Publications Sales Department, Royal College of General Practitioners, 8 Queen Street, Edinburgh EH2 1JE, price £10 to members, £12 to non-members, including postage. Payment should be made with order.

MRCGP CANDIDATES

New practice exams now available. Two MCQ papers (120 questions) covering the new subject areas as required by the Royal College. (This includes social and legal aspects, epidemiology, statistics and practice organization.) Answers and detailed teaching explanations provided together with computer sheets and free marking service. UNIVERSITY OF HONG KONG
READERSHIP/SENIOR LECTURESHIP IN GENERAL PRACTICE

Applications are invited for a new post of Reader/Senior Lecturer in General Practice to be located initially in the Department of Medicine. Applicants must have medical qualifications registrable in Hong Kong, plus a Membership or Fellowship of a Royal College of Physicians and/or General Practitioners of the United Kingdom or Australia. Teaching and research experience is essential and a knowledge of spoken Cantonese is desirable.

Annual salaries (superannuable) are: Reader (fixed) HK$383,560 (£34,778 approx.), Senior Lecturer (6-point scale) HK$321,600–362,400 (£29,236–32,945 approx.) (Sterling equivalent as at 16 February 1984). Starting salary will depend on qualifications and experience.

At current rates, salaries tax will not exceed 15 per cent of gross income. Housing at a rental of 7.5 per cent of salary, children’s education allowances, leave and medical benefits are provided.

Further particulars and application forms may be obtained from the Secretary General, Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF, or from the Appointments Unit, Secretary’s Office, University of Hong Kong, Hong Kong. Closing date: 30 April 1984.
Gastro-technology

Tagamet cimetidine
acid controlled

Prescribing Information. Presentations “Tagamet” Tablets, PL 0002/0092, each containing 400 mg cimetidine. 56, £16.61. “Tagamet” Tablets, PL 0002/0063, each containing 200 mg cimetidine, 500, £14.15. “Tagamet” Syrup, PL 0002/0073, containing 200 mg cimetidine per 5 ml. 500 ml, £20.43. Indications Duodenal ulcer, benign gastric ulcer, recurrent and stomal ulceration, oesophageal reflux disease. Other conditions where reduction of gastric acid is beneficial: prophylaxis of stress-induced gastrointestinal haemorrhage and of acid aspiration (Mendelson’s) syndrome; malabsorption and fluid loss in short bowel syndrome. Zollinger–Ellison syndrome. Dosage Usual dosage: Adults. Duodenal ulcer: 400 mg b.d. with breakfast and at bedtime, or 200 mg t.d.s. with meals and 400 mg at bedtime (1.0 g/day) for at least 4 weeks. To prevent relapse, 400 mg at bedtime or 400 mg morning and at bedtime for at least 6 months. Benign gastric ulcer: 200 mg t.d.s. with meals and 400 mg at bedtime (1.0 g/day) for at least 6 weeks. Oesophageal reflux disease: 400 mg t.d.s. with meals and 400 mg at bedtime (1.0 g/day) for 4 to 8 weeks. Prophylaxis of stress-induced gastrointestinal haemorrhage, up to 2 g a day, divided, to maintain intragastric pH above 4. Prophylaxis of acid aspiration syndrome: 400 mg 90-120 mins before induction of general anaesthesia, 400 mg at start of labour then 200 mg 2-hourly as necessary. Suggested maximum 1.6 g. Do not use “Tagamet” syrup. Zollinger–Ellison syndrome, up to 2 g a day, divided. Recurrent and stomal ulceration and short bowel syndrome, 200 mg t.d.s. and 400 mg at bedtime (1.0 g/day). N.B. For full dosage instructions see Data Sheet. Cautions Impaired renal function: reduce dosage (see Data Sheet). Potentiation of oral anticoagulants, phenytoin and theophylline (see Data Sheet). Prolonged treatment: observe patients periodically. Exclude malignancy in gastric ulcer. Care in patients with compromised bone marrow (see Data Sheet). Avoid during pregnancy and lactation. Adverse reactions Diarrhoea, dizziness, rash, tiredness. Rarely, mild gynaecomastia, reversible liver damage, confusional states (usually in the elderly or very ill), interstitial nephritis, acute pancreatitis. Legal category POM. 9.12.83.
