in the treatment of peptic ulcer

ROTER has particular advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

Subnormal Personalities

by C. J. C. EARL, F.R.C.P.I., F.B.Ps.S., D.P.M., late Medical Superintendent, Monyullah Hospital, Birmingham.

With additional material by H. C. GUNZBURG, M.A., Ph.D., F.B.Ps.S., Consultant Psychologist, Director of Psychological Services, Monyullah Hall, Birmingham.

Foreword by KENNETH SODDY, M.D., D.P.M., Physician, Department of Psychiatric Medicine, University College Hospital, London.

This is an unusual book, representing the pioneer work of a brilliant clinician in evolving a method of investigating and assessing the personality of individuals whose social and/or scholastic failure can be attributed to lack of development in one or more of the aspects of personality.

Dr Earl's approach has been to investigate the complex nature of personality by considering nine relatively simple aspects of it, and the basis of his work is the careful observation of the patient, not only in the clinic and under test, but in every aspect of his living and development. Psychological testing methods are discussed, with particular reference to the author's own Moron Battery, a set of form tests devised to predict the likelihood of social survival in subnormal young men.

The things they say!!!

Some Practitioners, in less controlled moments, have been heard to say harsh and even uncomplimentary things about their ulcer and indigestion patients. Patients have been heard to say even harsher and more uncomplimentary things about their Doctors. We, however, blush at the complimentary letters we receive from both busy practitioners and their patients telling of DROXALIN’S efficacy and palatability in Gastric Ulcer, Hyperacidity and Sickness of Pregnancy.

‘Droxalin gives rapid relief to abdominal pain and discomfort due to Hyperchlorhydria and Peptic Ulcer’.
M.B., Ch.B., M.R.C.S., L.R.C.P.

‘An excellent tablet for indigestion, and in particular for the indigestion of pregnancy’. M.B., B.S., D.A.

‘I often have acute Dyspepsia and find it necessary to keep Droxalin by my bedside’.
M.B., B.S., F.R.C.S., L.R.C.P.

B12

MOST COMPLEX MOST POTENT VITAMIN

First isolated in Britain by Glaxo, B12, with an effective dose measured in millionths of a gram, is the most potent vitamin of all. Maintenance injections of just 250 micrograms of B12 allow patients with pernicious anaemia to lead a normal life. In conditions such as trigeminal neuralgia, herpes zoster, seborrhoeic dermatitis and certain neuropathies, doses of 250 to 1,000 micrograms are now commonly given. Taken in liquid or tablet form as a tonic, B12 can help to improve appetite and to promote a feeling of well-being. Both the sugar-coated tablets and the fruit flavoured liquid are taken very happily by children.

SEARLE
the catarrhal child

JOHN FRY

price 25/-

The child with recurrent infections and affections of the respiratory tract, is a persistent problem to the whole community. This book is based on the observations, records, and clinical conclusions of one family doctor, into the causes, the natural history, and the many and various problems of the condition. It is the outcome of a 10-year study and follow up of 750 children, reporting unique source material for all medical men and women investigating common respiratory illnesses among children. The unusual quality of the author’s presentation of his material will prove the book most helpful to the intelligent parent, family doctor, the paediatrician and he consultant.

intra-abdominal crises

K. D. KEELE & N. M. MATHESON

price 50/-

The authors have called acute abdominal pain and vomiting, which have no diagnostic label, intra-abdominal crises. First they analyse the problem of the abdominal emergency, indicate the lines of early management, and stress the importance of diagnostic exclusion. The main theme of the book, however, is the increasing role played by the techniques of radiology and biochemistry under conditions of crises. The significance of the results obtained involves wide possibilities of anatomical and pathological interpretation, with a broadening of the problems of differential diagnosis.

toxicity of industrial metals

ETHEL BROWNING

price 50/-

This book provides a survey of the main features of the occurrence, preparation, physical and chemical properties, metabolism and toxicology of the principal metals encountered in modern industry.

Special attention has been devoted to the metabolic features: first, from the point of view that a knowledge of their paths of absorption, excretion and distribution within the body may indicate how and where their potential toxic effects are likely to be exerted, and therefore in some measure how these effects can be prevented; secondly, with a view to the increasing importance of the possibility of the entry of some of them in radioactive form from nuclear fall-out.

PHARMACEUTICAL SPECIALITIES
at the Service of the Medical Profession
IN RHEUMATOID ARTHRITIS

In rheumatoid arthritic conditions, more patients can now be treated more effectively—with 'DECADRON'. Its greater anti-inflammatory action often brings relief in cases which have not responded to other steroids.

'DECADRON' gives increased therapeutic effectiveness, but a decrease in such side-effects as hyperglycaemia, hypertension and oedema. Improved appetite and gain in weight are usually welcomed.

In rheumatoid arthritis, low maintenance dosage with 'DECADRON' may make the difference between useful employment and invalidism.

United Kingdom N.H.S. basic costs are 6s. 3d. for 10 × 0.5 mg. tablets and 9s. 5d. for 10 × 0.75 mg. tablets (ex dispensing packs).

THE COLLEGE OF GENERAL PRACTITIONERS
41 Cadogan Gardens, London, S.W.3

Associateship

Any registered (or provisionally registered) medical practitioner is eligible for admission as an associate, provided he gives an undertaking that if he enters or remains in general practice he will continue approved postgraduate study and will uphold and promote the aims of the College to the best of his ability.

(A provisionally registered medical practitioner shall cease to be an associate if he fails to obtain registration within two years of qualification.)

Membership

The Council of the College admits to membership, after consultation with the Board of Censors, registered medical practitioners who have been qualified for not less than seven years and have been engaged in general practice for not less than five years or, as an associate, for three years.

An applicant for membership must:— (1) Be proposed and seconded by two members of the College—not being in partnership with each other. (2) Submit evidence concerning his practice, experience, and academic and administrative achievements. (3) Submit himself to an interview with the board of censors, if required. (4) Give an undertaking that he will continue approved postgraduate study while he remains in active general practice, and that he will uphold and promote the aims of the College to the best of his ability. The Council may seek supporting evidence of his eligibility from his sponsors, the board of the faculty in whose area he resides, and, if so required, from others whom he or his sponsors may choose to appoint.

Entrance Fees and Subscriptions

Associates make an annual subscription of £2 2s. 0d. but pay no entrance fee. Members are required to pay an entrance fee on admission of £10 10s. 0d. and make an annual subscription of £5 5s. 0d.

Forms of application for admission to associatehip and membership may be obtained from The Secretary, The College of General Practitioners, 41 Cadogan Gardens, London, S.W.3. Tel. No. Sloane 8333.
