Systemic Zovirax does more than just touch the surface of shingles... to resolve the skin manifestations and of secondary infection.

The systemic route with the Zovirax Treatment Pack can reach the peripheral nerves where it can inhibit replicating shingles virus.

Zovirax, in treating this systemic disease, significantly curtails vesiculation, accelerates healing and reduces pain during the eruptive phase. 

Because shingles calls for the full Zovirax treatment. *Zovirax acyclovir Shingles Treatment Pack

GENERAL PRACTITIONERS
IN KHAMIS MUSHAYT AND JEDDAH, SAUDI ARABIA

Generous Tax Free Salary and Package
including
Free High Class Family Accommodation • 7 Weeks Annual Leave
• Substantial School Fees Allowance • End of Contract Bonus
• Free Generous Holiday Flights for Dependents

Guy’s Hospital is providing consultancy services, support, training and quality assurance to two major hospitals in Saudi Arabia in conjunction with South East Thames Medical Enterprises. The hospitals provide health care services for the Saudi Arabian Armed forces and their dependents.

Experienced GP’s are required. The possession of a MRCGP is an advantage, as is some experience of accident and emergency medicine.

The range and scope of the medical care offered at the two hospitals is similar to a district hospital in the UK with the addition of primary care clinics. Both hospitals also run a number of satellite primary care clinics. The locations of the two hospitals present a choice of culture and environment. Both hospitals have about 200 beds: The King Fahad Armed Forces Hospital is in Jeddah, a modern cosmopolitan city on the Red Sea, and The King Faisal Hospital is in Khamis Mushayt, a town enjoying a Mediterranean climate, situated in the mountainous Asir region.

Applications should be made, enclosing a CV, to Dr Rodney Turner, Consultant in Primary Care, South East Thames Medical Enterprises, Tabard House, St Thomas Street, London SE1 9RT.

HEALTH CARE IN PARTNERSHIP WITH THE GUY'S TRADITION OF EXCELLENCE

British Journal of General Practice, June 1991
Feldene* Gel offers an effective topical alternative first-line treatment in mild osteoarthritis.

A topical alternative in mild osteoarthritis

Prescribing information for Feldene* Gel

Indications: Topical therapy of osteoarthritis of superficial joints and acute musculoskeletal disorders. Dosage: For external use only. Occlusive dressings should not be used. Apply one gram of the gel and rub into the affected site three to four times daily leaving no residual material on the skin. Therapy should be reviewed after 4 weeks. Contra-Indications, Precautions: Contra-indicated in patients who have previously shown a hypersensitivity to the gel or piroxicam in any of its forms, aspirin or other non-steroidal anti-inflammatory agents. If local irritation develops, discontinue Feldene Gel. Keep away from the eyes and mucosa. Do not apply to sites affected by open skin lesions, dermatoses or infection. Use in children: Not recommended. Use in pregnancy and lactation: The safety of Feldene Gel during pregnancy and lactation has not been established. Side-effects: Mild or moderate local reactions at the application site. Mild but transient skin discoloration and staining of clothing have been noted when the gel is not rubbed in completely. Package Quantities and Basic NHS Cost: 60g tube – £7.77 (Pl. 0057/0284). Further information on request. References: 1. Dickson DJ. Curr Ther Res 1991; 49[2]:199-207.
