When the itching has to stop

Rather than topical steroids or antihistamines, you can now prescribe a bath oil with a clinically proven antipruritic action.

Balneum Plus is the first bath oil to contain lauromacrogols for their local anaesthetic properties.

These, combined with the emollient effects of soya oil, produce a bath oil that provides relief for patients with dry, itchy skin.

REFERENCES

PRESCRIBING INFORMATION
Presentation: An oily liquid for external use containing soya oil 92.057% w/w and mixed lauromacrogols 1.5% w/w.
Uses: For the treatment of dry skin conditions including those associated with dermatitis and eczema where pruritus is also experienced.
Dosage and administration: Normally 20 ml (1 measure) for a full bath or 2.5 ml for a partial bath. If required, can be increased to 2-3 times the amount. Add to bath water and mix well. Frequency and duration of application depend upon the type and severity of the condition. For babies and infants a daily application is recommended. Balneum Plus can also be used in the shower.
Contraindications, warnings, etc.
Contraindicated in patients hypersensitive to any of the ingredients. Care should be taken to guard against slipping in the bath or shower.
Legal category P
Package quantities: Bottles of 500 ml
Product licence number: 0103 0857
Product authorisation number: 54 71 1

Balneum Plus
Antipruritic medicinal bath oil
makes light work of pruritic skin
In their youth they took the dog for great long walks. When heart failure was diagnosed they wondered if they'd have to give up owning dogs for good.

Now, once-daily 'Zestril' is an effective step you can take in the General Practice management of patients with mild to moderate heart failure. Not only has 'Zestril' been shown to improve clinical parameters\textsuperscript{1,2} but it has also been shown to improve the symptoms of congestive heart failure\textsuperscript{3,4} - helping patients like these to feel a little more like their old selves.

\textbf{RELIVING THE GOOD TIMES!}

\textbf{Zestril}

\textbf{Lisinopril}

\textbf{ONCE-DAILY IN CHF}

Helps patients rediscover that \textit{Zest for life in CHF}

\textbf{PRESCRIBING NOTES}

Consult dated sheet before prescribing. USE: All grades of essential hypertension and renovascular hypertension. Congestive heart failure (adjunctive therapy). PRESENTATION: Tablets containing 2.5mg, 5mg, 10mg or 20mg lisinopril ('Zestril'). DOSAGE AND ADMINISTRATION: Hypertension – Adults (including elderly): initially 2.5mg daily, a 2.5mg dose seldom achieves a therapeutic response; adjust dose according to response. Maintenance usually 10-20mg once-daily. Maximum is 40mg daily. Dihydropyridine patients – if possible stop diuretic 2-3 days before starting 'Zestril'. Resumes diuretic later if desired. Congestive heart failure: Adults: initially 2.5mg daily under close medical supervision (hospitalisation for severe or unstable heart failure and other patients at higher risk), increasing to 5-20mg once-daily according to response. Monitor blood pressure and renal function. Renal impairment: May require lower maintenance dosage. CONTRAINDICATIONS: Pregnancy, Hypersensitivity to 'Zestril'. Patients with history of angioedema to previous ACE inhibitor therapy. Patients with aortic stenosis, cor pulmonale or outflow tract obstruction.

\textbf{PRECAUTIONS:} Assessment of renal function is recommended. Symptomatic hypotension may occur, particularly in volume-depleted patients and congestive heart failure. Caution in patients with ischaemic heart or cerebrovascular disease; renal insufficiency; renovascular hypertension. Patients with a history of angioedema may be at increased risk of angioedema with an ACE inhibitor. Cough has been reported with ACE inhibitors. Renal impairment (usually reversible) may occur in some patients. Hypotension may occur during surgery or anaesthesia. Caution in nursing mothers. No paediatric experience. Afro-Caribbean patients may show reduced therapeutic response. Symptomatic hypotension can be minimised by discontinuing diuretic prior to 'Zestril'. Interaction with inomochin and limcit. Potassium supplements, potassium-sparing diuretics and potassium-containing salt substitutes not recommended. Avoid concomitant use with high-flux dialysis membranes.

\textbf{SIDE EFFECTS:} Hypotension, dizziness, headache, diarrhoea, cough, nausea, fatigue. Less frequently, rash, asthma. Rarely, angioedema and other hypersensitivity reactions, myocardial infarction or cerebrovascular accident (possibly secondary to excessive hypotension in high risk patients, palpitation, tachycardia, abdominal pain, dry mouth, hepatitis, jaundice, mood alterations, mental confusion, urticaria, dysphoria, asthenia, oliguria, anuria, renal dysfunction, acute renal failure, impotence, pancreatitis. A symptom complex which may include fever, vasculitis, myalgia, arthralgia/myalgia, positive ANA, elevated ESR, eosinophilia, leukocytosis; rash, photosensitivity or other dermatological manifestations may occur. Increases usually reversible in blood urea, serum creatinine, liver enzymes and serum bilirubin. Decreases in haemoglobin and haematocrit have occurred. Hypervolaemia, melena, myalgia, arthralgia/myalgia, positive ANA, elevated ESR, eosinophilia, leukocytosis; rash, photosensitivity or other dermatological manifestations may occur. Increases usually reversible in blood urea, serum creatinine, liver enzymes and serum bilirubin. Decreases in haemoglobin and haematocrit have occurred.}

Managing Child Health Systems in a Changing NHS
A series of seminars will be presented by the Management Executive of the national Child Health System during the remainder of this year. Each event will give a different perspective of the issues that users of child health systems will need to address during the current dramatic changes in the NHS.
Presentations will be given by eminent speakers involved in some of the current national strategic developments, and also from users of the national system who will describe current projects designed to meet the new challenges.
A predominant theme of the seminars will be the achievement of quality in the delivery of child health services through the use of computing systems.

The 2nd St. George's Eating Disorders Conference
ANOREXIA, BULIMIA AND OBESITY
A two day multi-disciplinary conference
14th & 15th February 1994
£150.00
This conference will be multi-disciplinary with a practical orientation. It will set the scene by examining the spectrum of contributory factors in the development of anorexia, bulimia and obesity and will demonstrate approaches to treatment at St. George's and in the community. Subject matter will also include counselling and psychotherapy, psychodrama, art therapy and nursing, and the roles of the dietitian and of self-help groups. There will be an opportunity to attend two workshops and also to engage in comment and debate within the main programme.

MODIFYING TOBACCO CONSUMPTION
Psychological and behavioural approaches
A one day multi-disciplinary conference
Friday 4th March 1994
£75.00
Reducing tobacco smoking is one of the single most effective methods available for improving health and reducing premature mortality in the UK. Its importance has been highlighted by the Government's 1992 Health of the Nation White Paper.
This one day conference will provide practical information on smoking cessation based on the latest research findings. It will cover the nature of cigarette dependence and treatment of dependent smokers as well as issues of health promotion, prevention and education.

BEREAVEMENT AND COUNSELLING
New approaches in helping people come to terms with loss
A one day multi-disciplinary conference
Friday 25th March 1994
£85.00
This conference will review the recent developments in the field of bereavement research. It will assess whether the thinking put forward by Dr. Murray Parkes 20 years ago is still valid in our pluralistic society. We will examine who benefits most from counselling, how to assess the risks attached to bereavement and what the bereaved person needs.
The conference will include input from a range of different professions who may come into contact with the bereaved person: a GP, a bereavement counsellor, a chaplain, a nurse and a psychiatrist.

PGEA accreditation is sought for all of our conferences

For further details of any of these conferences including a registration form please contact:

UPDATE IN CARDIORESPIRATORY MEDICINE
FOR GENERAL PRACTITIONERS
21 - 24 FEBRUARY, 1994

COURSE ORGANISER
DR P COLLINS and DR K F CHUNG

This four day course will cover many topical aspects in Cardiac and Respiratory Medicine to give General Practitioners an insight into the up-to-date management of many common conditions.

Cardiac Medicine will include angina, myocardial infarction, heart failure and valvar heart disease. Practical sessions will take place in exercise testing, echocardiography, angioplasty and angiography.

Respiratory Medicine will include management of adult and paediatric asthma, respiratory infections and lung cancer, chronic respiratory care and practical sessions on pulmonary lung function and fibreoptic bronchoscopy.

Ample time will be allocated for discussion with physicians of the Royal Brompton National Heart & Lung Hospital.

PGEA approval has been granted

COURSE FEE: £300.00 for 4 days or £150.00 for 2 days (includes catering)

Enquiries and payments should be made to: Conference Centre,
National Heart & Lung Institute, Dovehouse Street, London SW3 6LY
Telephone: 071 351-8172 (24 hr answering service), Facsimile: 071 376-3442

Stay ahead with our free Asthma management pack

The National Asthma Campaign is Britain's leading asthma charity. Together with a team of specialists, the Campaign has recently revised its comprehensive series of booklets. Clearly written and presented, the booklets, which are aimed at both health professional and patient alike, contain the latest medical advice on asthma management. Subjects covered include: asthma in the under fives; steroid treatment; peak flow measurement; hayfever; spacers and nebulisers. The pack also comes with a set of asthma management cards and details of our telephone helpline on an A3 and A4 poster.

Please send me my free pack

Please return this form to Maggie Colling, National Asthma Campaign, Providence House, Providence Place, London N1 ONT or Fax your request to 071 704 0740.

The new generation of Liquid Nitrogen cryosurgical equipment from Cryotech offers considerable benefits to both practitioner and patient alike. Cryosurgical treatments are usually carried out in the consulting room in a non sterile environment and therefore avoid the need for costly hospitalisation. Lesions may be treated with little need for anaesthesia and without risk of haemorrhage, post operative care is minimal and a major benefit of Cryosurgery is the effect of little or no scarring.

All Cryotech's products are designed and produced for simplicity and ease of use, they are highly cost effective to operate and cost less to purchase than you imagine.

For further details please telephone 0773 821515 or contact Cryotech at the address below.

MINOR SURGERY COURSES
As a result of a major collaborative initiative the RCGP will be running a pilot series of intensive 2 day courses providing practical skills training intended to prepare doctors training for general practice in minor surgery. Courses will take place at a number of venues across the UK. Full details will be sent to all Departments of General Practice, Regional Advisers and others. Further information on the project will appear in January Connection.
MRCGP EXAMINATION – 1994

The dates and venues of the next two examinations for Membership are as follows:

May/July 1994
Oral examinations: In Edinburgh from Monday 27 to Wednesday 29 June inclusive and in London from Thursday 30 June to Saturday 9 July inclusive.
The closing date for the receipt of applications is Friday 28 February 1994.

October/December 1994
Written papers: Tuesday 25 October 1994 at those centres listed above.
Oral examinations: In Edinburgh on Monday 5 and Tuesday 6 December and in London from Wednesday 7 to Monday 12 December inclusive.
The closing date for the receipt of applications is Friday 2 September 1994.

MRCGP is an additional registrable qualification and provides evidence of competence in child health surveillance for accreditation.

For further information and an application form please write to the Examination Department, Royal College of General Practitioners, 14 Princes Gate, Hyde Park, London SW7 1PU, or telephone: 071-581 3232.

Royal College of Physicians of London

DIPLOMA IN GERIATRIC MEDICINE

The Diploma in Geriatric Medicine is designed to give recognition of competence in the provision of care for the elderly and is particularly suitable for General Practitioner vocational trainees and Clinical Assistants. It is also suitable for aspires candidates for any career post in Geriatric Medicine, or in allied fields such as the Psychiatry of Old Age, who wish to demonstrate their knowledge of the subject.

The next examination will begin on 22nd March 1994. Application forms, together with the necessary documentation, must reach the College by Friday, 11th February 1994.

Candidates must have held a post approved for professional training in a department specialising in the care of the elderly, or have had experience over a period of 2 years since Full Registration or equivalent in which the care of the elderly formed a significant part.

Further details and an application form may be obtained from:

Examinations Office
Royal College of Physicians of London
11 St Andrew's Place
Regents Park, London NW1 4LE

RCGP COURSES . RCGP COURSES . RCGP COURSES . RCGP COURSES . RCGP COURSES . RCGP COURSES .

DATA HANDLING FOR MEDICAL AUDIT

Course Director: Dr Oliver Samuel  Course Tutors: Dr Janet Peacock, Dr Lea MacDonald & Dr Steve Buster - 2/3 February 1994

A two day course in the technical skills involved in collecting and digesting medical audit information. The course is suitable both for interested general practitioners and their staff and for those working with Medical Audit Advisory groups. The course will study how to design questionnaires, select suitable ways of analysing the information and will review how to present the results. It will include some basic computer techniques - data entry and analysis, graphical presentations etc. The intention is to develop practical skills to help medical auditors make valid observations about current clinical practice.

PGEA approved for 2 days. The fee is £250.00 for members and £275.00 for non-members.

TEACHING THE MEDICAL AUDIT TEACHERS

Course Tutors: Dr Oliver Samuel, Dr Bonnie Sibbold, Dr Paul Sackin and Dr David Clegg - 23/24/25 February 1994

A three day course in medical audit for those who teach it. The course is for 24 participants, all of whom will have some experience of medical audit and are likely to be involved in teaching about it. The course is designed to present the subject of medical audit and to examine three related topics: standard setting, the collection and analysis of data and the management of change within the practice while also considering how to present and teach these subjects to colleagues. Pre-course work will involve some preparation and selected reading. PGEA approved for three days - zero-rated Section 63 course to enable Regional Advisers to sponsor tutors or trainers. The cost will be £300.00

THE LEARNING NEEDS OF ESTABLISHED GP's

8 March 1994

The morning of this study day will concentrate on establishing what the learning needs of GP's might be. Presentations will include: Wants vs Needs - A number of surveys of GP's in different parts of the country - In service training for GP Educators. The afternoon will concentrate on ‘Developing research skills’.

Section 63 applied for. The fee is £50.

LEADING, MANAGING AND UNDERSTANDING SMALL GROUPS

Course Tutors: Dr Geoff Roberts, Ms Lynn Freeman and Dr Oliver Samuel - 15/16 March and 4th May 1994

The course would be relevant to all doctors working in a group setting, either as a junior or senior partner, Course Organisers, GP Tutors, Audit Advisers, GP Advisers and any person with a serious interest in how groups function, and the nature of leadership. The aim of this short course is to develop both understanding and skills in leading and managing small groups. Seminars will be used to provide baseline concepts of group theory. Group exercises will be used to illustrate theory and develop understanding, and small group meetings will provide time for the participants to reflect on their learning and experience of the course.

The fee is £300.00. PGEA approved for 3 days under Health Promotion & Prevention of Illness and zero rated Section 63 approval granted.

For further details please contact: RCGP Courses and Conferences on 071 823 9703 or Fax 071 225 3047

BRITAIN’S ARTHRITICS ARE STARTING TO MELT

Now you can offer your arthritic patients an entirely different way of taking oral NSAID therapy.

FELDENE MELT breaks the mould of traditional tablets and capsules. When placed on the tongue FELDENE MELT dissolves in seconds to provide 24 hour control of symptoms. In this way patients can benefit from night and day relief of pain, reduced inflammation and improved mobility.

Because it’s such a pleasant way of taking medicine, you may find many of your patients prefer FELDENE MELT to conventional capsules or tablets. Try them and see.

PRESCRIBING INFORMATION FOR FELDENE MELT
(piroxicam)

Indications: Adults: Rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, acute gout and acute musculoskeletal disorders. Elderly: As with other NSAIDs, elderly patients should be closely supervised. Children: FELDENE MELT is not recommended in children. For treatment of juvenile chronic arthritis (SJIA’s disease) please see oral dose sheet. Dosage: Rheumatoid arthritis, osteoarthritis and ankylosing spondylitis – normal starting and maintenance dosage 20mg once daily. Long-term use of 30mg daily or more carries an increased risk of gastro-intestinal side-effects. Acute gout – 40mg daily in single or divided doses for up to 7 days. Acute musculoskeletal disorders – 40mg daily in single or divided doses, for the first 2 days, 30mg daily for the remainder of the 7 to 14 day’s treatment. Contra-indications: Active peptic ulceration or history of recurrent ulceration. Hypersensitivity to FELDENE, aspirin or other NSAIDs. Warnings: Pregnancy, lactation.

Precautions: Significant renal, hepatic or cardiac insufficiency. Patients with phenylketonuria – each FELDENE MELT tablet contains 0.04mg phenylalanine. Drug interactions: Monitor patients on concurrent anticoagulants, lithium or diuretic therapy. Concurrent use of aspirin or other NSAIDs is not advised. Side-effects: Gastro-intestinal symptoms, if peptic ulceration or gastro-intestinal bleeding occurs withdraw FELDENE. Ordinaire, mainly ankle. Skin rashes. CNS effects, including headaches and dizziness. Rare cases of renal and hepatic abnormalities have been reported. Haematological reactions including thrombocytopenia and anemia and hypersensitivity reactions such as bronchospasm and anaphylaxis have been reported very rarely. Legal Category: POM. Pack Size Quantities and Price: MELT tablets 20mg, pack of 28, £11.97 (PL 0057/0037). Full information on request.
