G D Searle & Co Ltd

information on oral contraception

The research carried out by Searle during the last eight years into oral contraception has led to a considerable number of publications in the world medical press. Many of these publications deal specifically with the two Searle oral contraceptive products, CONOVID* and CONOVID-E† and are the basis of an information service available to the medical profession on request. This consists of fully documented reference manuals on CONOVID and CONOVID-E, a booklet in question and answer form dealing with many of the inquiries received regarding the use of the two products, and a booklet for patients available in quantity to the medical profession for distribution to their patients.

leaders in oral contraceptive research

*CONOVID tablets contain norethynodrel, 5 mg. and mestranol (ethinyloestradiol 3-methyl ether) 0.075 mg.

†CONOVID-E tablets contain norethynodrel 2.5 mg. and mestranol, 0.1 mg.

Quadrilin is unique. It gives protection simultaneously against the four most dangerous childhood diseases:

pertussis
diphtheria
tetanus and poliomyelitis

Laboratory and clinical trial has confirmed that Quadrilin is a highly potent vaccine that produces an adequate response to all components. By simplifying immunisation, Quadrilin can help to multiply considerably the number of children being protected in the critical early months of life. Because of the extremely high potency of the poliomyelitis fraction of Quadrilin (especially the Type 1 component) it can be given as early as three months of age to fit in with the Ministry of Health Schedule P.

In boxes of 1ml single dose ampoules.

VASOLOASTINE

for enzymatic control of cholesterol and fat metabolism in arteriosclerotic and atherosclerotic vessels

VASOLOASTINE contains enzyme systems which oxidize fatty acids, reduce arterial cholesterol content and tend to restore vascular elasticity

INDICATIONS

Arterio- and atherosclerosis,
Cerebral stenosis,
Cardio-vascular stenosis complicated with angina pectoris
when caused by fat and cholesterol deposition,
Fat and cholesterol metabolic imbalance generally,
Post-thrombotic symptoms

In clinical and experimental trials, toxic and side-effects have not been observed.

FORMULATION

per ampoule:

Enzymes of the lipid metabolism 30 mg. = 8000 units
Amin-oxidase 20 mg. = 4000 units
Tyrosinase 20 mg. = 4000 units

Stabilizing solvent to 2 ml.

Presentation: Boxes of 5, 25 and 100 ampoules.

Fentazin
in chronic bronchitis serves the physician best

- strongest, longest activity against H.influenzae
- unique extra-day protection against relapse
- no night-time medication—less risk of missed dose
Rinurel relieves sinus headache and the symptoms of the common cold, thus enabling the patient to continue normal activity with a minimum of discomfort to himself and others. Rinurel gives prompt, lasting relief from pain and discomfort without rebound congestion, gastric disturbance or constipation.

**Dosage**
Two tablets initially followed by one every four hours. Prophylactically one tablet every four hours.

**Formula**
- Paracetamol 150 mg
- Phenacetin 150 mg
- Phenylpropanolamine hydrochloride 25 mg
- Phenyltoloxamine dihydrogen citrate 22 mg.

for sustained relief of symptoms of bronchial asthma and chronic bronchitis

Tedral SA

The value of this combination of ephedrine, theophylline and phenobarbitone has been well established for many years. Now, with new Tedral SA, it is available as a sustained-action tablet which is effective for twelve hours. A Tedral SA tablet taken in the morning ensures day-long medication; a Tedral SA tablet taken at night minimizes sleep disturbances and the need for emergency therapy.

Bottles of 100 and 500 tablets. Each tablet contains 48 mg. ephedrine, 180 mg. theophylline, 25 mg. phenobarbitone.

For all sufferers from insomnia not due to pain Carbrital* can provide sleep of natural duration and depth. Combined in this preparation are a quick-acting hypnotic (pentobarbitone sodium), and a mild longer-acting sedative (carbromal). Thus, Carbrital brings about rapid onset of sleep and sustains it for several hours, yet leaves the patient free from undesirable residual depression on awakening.

**CARBRITAL**

*in all types of insomnia*

*KAPSEALS*: In bottles of 25 and 250 kapseals, each containing pentobarbitone sodium (11 grs) and carbromal (4 grs).

ELIXIR: In bottles of 4, 16 and 80 fl. ozs. Each fluid drachm (one teaspoonful) represents pentobarbitone sodium (1/8 gr) and carbromal (1/4 gr).

PARKE-DAVIS
Evidence as to the clinical efficacy of ALDOMET continues to appear in the medical press. To date, eight publications have appeared in British journals. (The complete bibliography on ALDOMET numbers over sixty papers.)

These reports give independent confirmation of the advantages of ALDOMET— in brief, reduction of lying as well as standing blood pressure, with less exertional hypotension and less diurnal fluctuation than hitherto, simplicity of administration and general lack of severe side effects.

for the simpler management of hypertension

ALDOMET is supplied as yellow, film-coated tablets containing 250 mg. methyldopa. Detailed information on dosage, administration, indications, precautions and bibliography is available on request.

ALDOMET is a product of Merck Sharp & Dohme research and is made in England by MERCK SHARP & DOHME LIMITED, Hoddesdon, HERTS

is clearly indicated

'Actifed' Compound Linctus—specific for cough with or without congestion—contains triprolidine hydrochloride, pseudoephedrine hydrochloride and codeine phosphate. For congestion without cough—'Actifed' Tablets or, for children, 'Actifed' Syrup.

BURROUGHS WELLCOME & CO. (The Wellcome Foundation Ltd.) LONDON
Drapolene
specific for napkin rash

The success of Drapolene as a preventive and treatment of napkin rash is due to its activity against the urea splitting organisms which are known to be the causative factor of this common skin condition.

Drapolene is formulated in a pleasant water miscible base which promotes residual activity, thus preventing the liberation of free urinary ammonia.

Drapolene is quick acting, even where an ulcerated condition has developed. It also assists cleansing of the affected area.

FORMULA
Benzalkonium chloride: 0.01 percent in a water miscible base.

ACCIDENT PREVENTION AND LIFE SAVING
Convention

A convention will be held at the Royal College of Surgeons of
England, Lincoln’s Inn Fields, London, W.C.2, on 14 and 15 May,
1963.

The theme of the convention is the need to remind the nation
of the urgency of promoting the training, self-control and regulation
necessary to prevent accidents of all kinds. The emphasis is medical
and the accent is upon youth.

It is hoped that as many members and associates of the College
as possible will attend this convention. The registration fee of
£4 4s. 0d. includes coffee, lunch and tea. Early application should
be sent to The Secretary, College of General Practitioners, 14
Princes Gate, London, S.W.7.
