

A Superior Buffered Analgesic

'**ALASIL**' Tablets—the improved form of salicylate medication — provide the efficient analgesia expected from their content of aspirin. Their superior acceptability derives from their content of a reliable buffer which minimizes the tendency to gastric irritation sometimes caused by the use of aspirin alone.

Advantages

'Alasil' is an advanced sedative and antipyretic; it does not tend to induce gastric irritation; because of its high tolerability, it may be used for long-term administration even to those with sensitive stomachs, and to children.

Composition

'Alasil' Tablets contain the recognized antacid corrective, 'Alocol' (Colloidal Aluminium Hydroxide), which permits their sedative principle, acetylsalicylic acid, to exert its action with minimal risk of side-effects.

Indications

Symptomatic pain generally; rheumatism, fibrositis, lumbago, headache, dysmenorrhoea; dental pain.

Packs & Prices

NASAL DROPS

**produce a distinctive
clinical response***

Predsol Nasal Drops are a stable, crystal-clear, *true* aqueous solution of 0.1% prednisolone phosphate, the most soluble prednisteroid. Two thousand times more soluble than hydrocortisone, or prednisolone itself, Predsol achieves the most rapid and most thorough contact with affected tissues after topical application, so producing maximum therapeutic effect.

* *Brit. Med. J.*, 1958, 1, 969.

Gradual 3-stage relief

-  Relief of nasal obstruction
-  Episodic attacks become milder and shorter, then cease.
-  Threshold of irritability of nasal mucosa gradually returns to normal.

Simply administered. Two drops instilled into each nostril four times a day produce a distinctive clinical response in most cases of hay fever.

Predsol Nasal Drops are issued in bottles of 10 cc.

respond to **'DISTAQUAINE' V-K**

POTASSIUM PENICILLIN V

'Distaquaine' V-K is the potassium salt of the reliable oral penicillin—penicillin V free acid. Being more soluble than the free acid, 'Distaquaine' V-K gives earlier peak blood levels and higher therapeutic concentrations.

For greater convenience in adjusting dosage, it is available in two strengths:

'DISTAQUAINE' V-K 125

125 mg. tablets

'DISTAQUAINE' V-K 250

250 mg. tablets

in foil packs of 12 and bottles of 100 and 500.

Dosage: One or more tablets, depending upon the severity of the infection, at four-hourly intervals. Children, half the adult dosage.
