Important books from Bailliere, Tindall and Cassell

May and Worth's Manual of Diseases of the Eye

T. KEITH LYLE, C.B.E., M.A., M. Chir.(Cantab), F.R.C.P., F.R.C.S.

A. G. CROSS, M.A., M.D.(Cantab), F.R.C.S.

C. A. G. COOK, M.C., G.M., M.R.C.S., L.R.C.P., D.O.M.S.

In this standard textbook, ophthalmology is treated as a branch of general medicine and surgery. Much attention has therefore been paid to such important matters as the anatomical and physiological relationship of the eye to other systems such as the vascular and nervous systems, and to the effects on the eye of diseases, the primary focus of which is elsewhere.

Three very fully illustrated new chapters, which have been written by Mr. Montague Ruben, F.R.C.S., on the difficult and important subject of visual optics. The entire text has been carefully revised to bring it thoroughly up-to-date.

13th edition 832 pages 334 illustrations 24 colour plates 70s.

Medical Microbiology (Concise Medical Textbook Series)

C. G. A. THOMAS, M.A., B.M., B.Ch.(Oxon), M.R.C.P., M.C.Path.

This is the new edition of Bacteriology from the Concise Medical Textbooks Series. Since the publication of the first edition much new information has come to light—knowledge which is essential to medical students today. Study of Dr Thomas's book will, by supplementing lectures and practical work, provide the student with a sound basic knowledge of medical microbiology. It will also be useful as a revision text for graduates.

2nd edition 344 pages 25s.

Radar and space probe instruments give you accurate scanning, early detection and immediate identification of the unknown. So do LABSTIX* reagent strips.

Covering a wide range of five tests (for blood, ketones, glucose, protein and pH) LABSTIX reagent strips provide the most comprehensive urine test available in convenient form for detecting signals of disease.

Like radar, to be effective LABSTIX should be used routinely, on *every* call.

Insure yourself against missing something – before it is *too late*.

**two complementary
antihypertensive
agents—but 'single
tablet' convenience**

Hydromet[®]

Methyldopa BP and hydrochlorothiazide BP

For many hypertensive patients, 'Hydromet' may often be the most suitable treatment. 'Hydromet' contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. Note the substantial advantages which 'Hydromet' can bring to your patients.

- the convenience of a single tablet
- 'Hydromet' usually makes a satisfactory control of blood pressure possible on a lower dosage of methyldopa
- in some severe and resistant cases, 'Hydromet' can produce a greater antihypertensive response than methyldopa alone
- the diuretic action of hydrochlorothiazide is useful when hypertension is complicated by heart failure and oedema
- symptomatic postural hypotension is much less frequent than it is with other powerful antihypertensive agents

Available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP. Detailed information is available to physicians on request.

He cheats a little over exchanges . . . forgets his diet on holiday . . . and nothing very terrible happens – at the time. It's easy for the non-insulin dependent diabetic to lapse into complacency – but you can shake him out of it with CLINISTIX. You can make him understand that purple means danger – purple colour on the CLINISTIX is visible proof that control is slipping. Good control from the outset is essential if the risk of complications such as retinopathy and nephropathy is to be reduced: the patient who spends a few minutes a week on testing can save years of misery later.

For the insulin dependent diabetic prescribe CLINITEST*. Both CLINISTIX and CLINITEST are prescribable on EC10.

**The diabetic's first
complication is
COMPLACENCY**

treat it with CLINISTIX*

Detect abnormal blood urea in 60 seconds

Azostix*

REAGENT STRIPS

Wherever you are, a valuable blood urea result at your fingertips in one minute.

All you need with AZOSTIX reagent strips is one large drop of blood, a watch, a wash bottle and one minute to detect abnormal (and normal) blood urea.

Available in bottles of 25 strips
(colour chart provided on bottle label).

A UNIQUE ORAL GEL WITH STRIKING ANALGESIC AND ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the

original infection Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

FORMULA: Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

INDICATIONS: Herpes labialis, gingivitis, oral ulcerations, cheilosis, denture sores, infant teething disorders.

PRESENTATION: Bonjela is available in 10 g. tubes at a basic N.H.S. cost of 2/8½d. per tube.

STANDARD

The size of the wicket

A famous cricketing standard — the present dimensions of 28" x 9" for the size of the wicket — was set in 1947, having started off in 1700 at 22" x 6" with two stumps and one bail. And to go even further back, the size of the wicket, the distance of the crease from it, and the length of the pitch, all correspond with divisions or multiples of the early Tudor unit of length measurement, the "gad" of 16½ ft. and the "ell" of 45 inches.

LLOYD-
HAMOL
Ltd.

The N.H.S. price of the 30g. tube is 2/6d. and the cost of an average application of cream is under 1d.

STANDARD

The Transvasin therapy for rheumatic symptoms

Patients suffering from rheumatic lesions obtain rapid relief with this well-proven and economical medication. The esters of nicotinic, salicylic and p-aminobenzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a valuable adjuvant in the treatment of osteo- and rheumatoid arthritis.

CONTAINS

Ethyl Nicotinate	2%
Hexyl Nicotinate	2%
Tetrahydrofurfuryl Salicylate	14%
Ethyl Aminobenzoate	2%
Base	to 100%
