CHURCHILL LIVINGSTONE

TEXTBOOK OF MEDICAL TREATMENT

Edited by STANLEY ALSTEAD, ALASTAIR MACGREGOR and RONALD H. GIRDWOOD
1971 Twelfth Edition 708 pages 36 illustrations. £4.25

'The reason for its popularity is not far to seek. It is written by clinicians and carefully edited so that the emphasis throughout is on what the man in practice requires. Its aim is to provide the clinician—whether consultant or general practitioner—with a sound, reliable and up-to-date account of methods of treatment which have proved of value'.—*Practitioner*.

CLINICAL GYNAECOLOGY

WALLACE BARR

1971 260 pages 141 illustrations £3.00

Clinical Gynaecology is a guide for those who wish to learn the practice of clinical gynaecology. Emphasis is given to diagnosis, and to the increasing trend in gynaecology which stresses the importance of medical management in preference to the surgical approach which has hitherto been dominant. Chapters on Anatomy, Physiology and Development, while valuable for reference, have been relegated to the end of the book. Within recent years the advent of laparoscopy and of Sonar have done much to banish the guesswork from gynaecology. These new techniques are described and their use is incorporated in the text.

PHYSIOLOGY FOR PRACTITIONERS

IAN C. RODDIE

1971 208 pages £1.50

'One could hardly expect the physiology of every clinical trick to be explained, but the field covered is very wide. A few of the topics included, mentioned to whet one's appetite, are the renin-angiotensin theory, the capacity function (as distinct from the transport function) of the venous system, synaptic transmission, brown fat, posture control, energy balance failure, how skeletal muscles are organized and why arterioles offer more resistance than capillaries. Endocrinology and the regulation of reproduction receive full consideration also'.—*Practitioner*.

RADIOLOGY FOR GENERAL PRACTITIONERS AND MEDICAL STUDENTS

DAVID SUTTON

1971 Second Edition 110 pages 82 illustrations £1.25

'All the more common investigations are clearly displayed and described and the more difficult procedures made to appear not so desperate as is often imagined. The pictures are excellent. This small volume should prove invaluable, and find an honoured place on the doctor's bookshelf'.—*Journal of the Royal College of General Practitioners*.

CALLING THE LABORATORY

Edited by W. A. R. THOMSON

1971 Third Edition 160 pages 6 illustrations £1.50

'*Calling the Laboratory* embodies a series of articles which appeared in *The Practitioner* on the laboratory investigation of clinical material. The main object of these articles is to show how the laboratory can be of service. There is also due emphasis on proper methods of obtaining specimens. The range covered is wide, including tests for pregnancy, infertility, and alcoholic intoxication as well as methods used in bacteriology, haematology, and chemical pathology'.—

British Medical Journal.

Teviot Place Edinburgh

A name to conjure with.

'Largactil' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'Largactil' was so named because of its LARGE variety of ACTIONS; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'Largactil' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

Alone, or as an adjuvant –
are you making **FULL** use of
'Largactil'?

Full information is available on request.

for a patient with cardiac failure

MODURETIC[®] DIURETIC

'Moduretic' provides a smooth and highly effective diuresis and, at the same time, *helps the body to conserve its natural potassium*. These features are of additional benefit when, perhaps unknown to the physician, an oedematous patient is also living on a diet which is low in potassium.

'Moduretic' offers a most acceptable alternative to the numerous and often unpalatable potassium supplements required during prolonged diuretic therapy. Oral potassium should not be given with 'Moduretic'.

By conserving the body's natural potassium, 'Moduretic' helps the patient whose symptoms of weakness and lethargy are not 'just old age', but are in fact caused by potassium depletion.

'Moduretic' should always be considered for oedematous patients who also require digitalis. The potassium-conserving effect of 'Moduretic' can play an important part in reducing the risk of digitalis intoxication.

a highly effective diuretic that entirely obviates the need for potassium supplements

'Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride and 50 mg hydrochlorothiazide. Detailed information is available to physicians on request.

Madam prefers Esbatal

"Seventy-five per cent of patients spontaneously complained of various degrees of tiredness on methyl dopa, as against 10 per cent on bethanidine (ESBATAL) and 17 per cent on guanethidine."⁽¹⁾
 "Side-effects are fewer and milder...."⁽²⁾
 "The lower incidence of side-effects, and the more rapid response to change in

dosage makes bethanidine (ESBATAL) a more satisfactory drug."⁽³⁾
 "Thus bethanidine (ESBATAL) not only on grounds of cost but also because of its therapeutic effectiveness has a strong claim to be considered as today's first choice of drug treatment of severe hypertension."⁽⁴⁾

ESBATAL

the effective antihypertensive with fewer side-effects

**When the
mind magnifies...**

**Restores emotional stability
effective in the majority of all cases of anxiety**

"Improvement on the Anxiety Rating Scale was seen in 95% of patients scored at the end of 2 weeks."²

**Enhances mood
relieves any depressive overlay**

"It was found to normalize anxious mood and effected a valuable restoration of perspective in the patient's attitude towards worries and fearful apprehensions."³

"It is noteworthy that among the 35 patients to whom no previous treatment had been given immediately before the trial, only six failures occurred, the remainder responding very well to treatment, including some patients with a depressed mood overlying the anxiety neurosis."²

**Rapid action
fast clinical response**

"... at the end of the first week with oxypertine, 6% had been completely relieved of symptoms, and 42% partially relieved... At the end of the fourth week there were now 35% completely relieved with oxypertine [Integrin] and 43% partially relieved..."⁴

**Causes less drowsiness
less effect on reaction time**

In reaction time tests, patients treated with Integrin showed more rapid response to stimuli and less incoordination than with diazepam.¹ Other investigators commenting on the low incidence of drowsiness with Integrin agree that when drowsiness does occur it can be relieved by adjustment of dosage with little reduction in therapeutic effectiveness^{2,3}

"Significantly superior to diazepam"¹

INTEGRIN
capsule 10mg

the 'fundamental' treatment for anxiety

... Integrin restores perspective

unlike other tranquillizers

INTEGRIN
capsule 10mg

combats the basic biochemical
disturbance associated with anxiety

Refs.

- 2 Med. Digest (1971) 16:472
- 3 Clin. Trials J. (1971) 8:3
- 4 Practitioner (1971) 206:822

Indications

Acute and chronic anxiety states and psychosomatic conditions whether or not accompanied by depressive overlay; tension, apprehension, agitation and sleep disturbances.

Dosage

The usual adult dose is one 10mg capsule three times daily, with a further capsule at bedtime if required. In certain cases up to 60mg daily may be needed. Should a milder effect be required the midday dose may be omitted.

Side Effects

Even in high doses, Integrin is well tolerated, with only minor, often transient, side effects. Some patients may experience some drowsiness. Dry mouth and dizziness have also been reported.

Precautions

Alcohol or other tranquillizers may potentiate the effect of Integrin and patients intending to drive should be made aware of this. Where MAO inhibitors have been used, 2-3 weeks should elapse before Integrin is started.

Safety Margins

No substantiated reports of toxicity have been received, even where patients have taken up to the equivalent of 56 capsules in 24 hours. Neither dependence nor withdrawal symptoms have been reported.

Presentation

Containers of 100 capsules. Each grey/green capsule contains 10mg oxypertine.

Basic NHS Cost

One week's treatment (1 capsule 10mg t.d.s.) is 36p

Integrin is a registered trade mark.

World Health Organisation and Council of Europe Fellowships 1973

A small number of fellowships for study abroad will be awarded in 1973 by the World Health Organisation and the Council of Europe. These are available to registered medical practitioners, dental practitioners, state registered nurses and other professional personnel engaged in the health services, medical education, or medical research in the United Kingdom.

The fellowships are awarded normally for periods of two weeks to one month. *Only in exceptional cases can periods longer than this be considered.* In each case the fellows are given a monthly allowance of approximately £110 per month, (the amount varying with the country or countries visited) together with all travelling expenses.

Applicants should be of at least five years standing in their profession and able to assess critically their visits and studies abroad so as to utilise the experience for the benefit of the health services of the United Kingdom. They will be expected to continue in the health services of the United Kingdom for at least three years after holding a fellowship.

Application forms for fellowships to be taken up in 1973 may be obtained:

- (a) *By those resident in Scotland from:*
The Secretary,
Scottish Home and Health Department,
12/14 Carlton Terrace,
Edinburgh EH7 5DG.
- (b) *By those resident in Wales:*
The Secretary,
Y Swyddfa Gymreig,
Welsh Office,
Health Department,
Cathays Park,
Cardiff CF1 3NQ.
- (c) *By those resident in Northern Ireland from:*
The Secretary,
Ministry of Health and Social Services,
Dundonald House,
Upper Newtownards Road,
Belfast 4.
- (d) *By others from:*
The Secretary,
Room B102
Department of Health and Social Security
Alexander Fleming House,
Elephant and Castle
London S.E. 1.

Envelopes should be marked "W.H.O. and Council of Europe Fellowships"
The completed application form should be returned to the office from which it was obtained not later than Saturday, May 27th, 1972.

University of Dundee

Course on Recent Advances in Occupational Health

25—29 September, 1972

A week's course, covering recent advances in occupational medicine, will be held within the Department of Social and Occupational Medicine, University of Dundee from Monday, 25 September to Friday, 29 September 1972. This course has been designed to meet the needs of Industrial Medical Officers and General Practitioners engaged as part-time Industrial Medical Officers. It is open to all qualified medical practitioners and is approved under Section 63 of the Health Services and Public Health Act 1968.

Enquiries and applications to W. Taylor, MD, Ph.D, FRCPE, Reader in Industrial Medicine, Department of Social and Occupational Medicine, The University, Dundee, DD1 4HN.

SOUTH-EASTERN REGIONAL HOSPITAL BOARD, SCOTLAND SOUTH-EASTERN REGIONAL COMMITTEE ON POSTGRADUATE MEDICAL EDUCATION

Appointment of a Regional Adviser in General Practice

Applications are invited from practising general medical practitioners for appointment to the new post of:—

**Regional Adviser in General Practice to the South-Eastern Regional
Committee on Postgraduate Medical Education.**

The successful candidate will have responsibility on behalf of the South-Eastern Regional Committee on Postgraduate Medical Education for co-ordinating the arrangements for vocational and continuing education in General Practice. The appointment will be for three years in the first instance. The appointment will be for three notional half days per week and the salary will be at the appropriate proportion of the maximum full-time salary of a consultant.

Further particulars may be obtained from the Secretary to the Regional Hospital Board at 11 Drumsheugh Gardens, Edinburgh, with whom applications should be lodged not later than 29 April, 1972. Applications should be typewritten and should give particulars of age, qualifications and previous experience, together with the names and addresses of three referees.

EASTERN REGIONAL HOSPITAL BOARD

**EASTERN REGIONAL POSTGRADUATE MEDICAL
EDUCATION COMMITTEE**

**Vocational Training Scheme for
General Practice**

A three-year vocational training scheme for general practice is to be introduced in August, 1972 by the Eastern Regional Hospital Board in conjunction with the Eastern Regional Postgraduate Medical Education Committee. The Scheme is recognised by the Royal College of General Practitioners as suitable preparation for the M.R.C.G.P. examination. It will consist of two years in selected hospital appointments at senior house officer level in the Dundee Group or the Perth Group of Hospitals and one year as a trainee in a selected teaching practice.

Application forms and further details may be obtained from the Secretary to the Board, Vernonholme, Riverside Drive, Dundee, with whom application forms should be lodged not later than 6 May, 1972.

British Postgraduate Medical Federation

University of London

**REGIONAL ADVISER IN GENERAL
PRACTICE**

**NORTH WEST METROPOLITAN
REGION**

Applications are invited from general practitioners in active group or partnership practice for the post of Regional Adviser in General Practice in the North West Metropolitan Region. The holder will be a member of the staff of the Regional Postgraduate Dean at the Central Office of the Federation. The appointment will be equivalent to two days a week for one year in the first instance, renewable for a further period of up to five years. The provisional salary will be £2,076 per annum, superannuable. Further information may be obtained on application to the Director (R.D.), British Postgraduate Medical Federation, 33 Millman Street, London, WC1N 3EJ. Closing date: 8th May, 1972.

POSTALOANS (grms) £20 to £5000.

No security.

RICHMOND INVESTMENTS
4 The Green, Richmond, Surrey,

CAMBRIDGESHIRE. To commence October 1st 1972, or sooner. A group of three requires a salaried partner, to be followed by succession and parity in two years, when the senior partner will retire. Health Centre practice, appointment system, full secretarial help, all-day nursing assistance. D/Nurse, H/Visitor attachments. Microscope, Haemoglobinometer, E.C.G.; full access to other diagnostic facilities. G.P. maternity unit; developmental paediatrics. Growing list should eventually allow expansion of group. This is a Fenland practice with an interesting future in a busy market town, possessing several advantages.—Dr J. R. Morton, 82 The Avenue, March, Cambridgeshire PE15 9PR
