Roter
*simply covers their
painless retreat*

Roter, once dispersed, provides a 'bandage' of micronised particles that literally covers the gastric or duodenal ulcer and protects it from chemical or mechanical irritants.

The result is almost immediate relief of pain; actual healing of the ulcer and avoidance of surgery.

**There's a wealth of clinical evidence to demonstrate the
effectiveness of Roter - and 24 years' successful use in General
Practice.**

"Seventy-five per cent of patients spontaneously complained of various degrees of tiredness on methyl dopa, as against 10 per cent on bethanidine (ESBATAL) and 17 per cent on guanethidine."⁽¹⁾

"Side-effects are fewer and milder...."⁽²⁾

"The lower incidence of side-effects, and the more rapid response to change in

dosage makes bethanidine (ESBATAL) a more satisfactory drug."⁽³⁾

"Thus bethanidine (ESBATAL) not only on grounds of cost but also because of its therapeutic effectiveness has a strong claim to be considered as today's first choice of drug treatment of severe hypertension."⁽⁴⁾
