Roter
*simply covers their
painless retreat*

Roter, once dispersed, provides a 'bandage' of micronised particles that literally covers the gastric or duodenal ulcer and protects it from chemical or mechanical irritants.

The result is almost immediate relief of pain; actual healing of the ulcer and avoidance of surgery.

There's a wealth of clinical evidence to demonstrate the effectiveness of Roter - and 24 years' successful use in General Practice.

Each Roter tablet contains: micronised Bismuth Subnitrate (Roter) 300mg., Magnesium Carbonate 400mg., Sodium Bicarbonate 200mg., and Frangula 25mg.

"Seventy-five per cent of patients spontaneously complained of various degrees of tiredness on methyldopa, as against 10 per cent on bethanidine (ESBATAL) and 17 per cent on guanethidine."⁽¹⁾

"Side-effects are fewer and milder...."⁽²⁾

"The lower incidence of side-effects, and the more rapid response to change in

dosage makes bethanidine (ESBATAL) a more satisfactory drug."⁽³⁾

"Thus bethanidine (ESBATAL) not only on grounds of cost but also because of its therapeutic effectiveness has a strong claim to be considered as today's first choice of drug treatment of severe hypertension."⁽⁴⁾

 Bencard

can soon become friend.

Amoxil can soon become a good friend because of its reliability in the routine treatment of a wide range of infections.

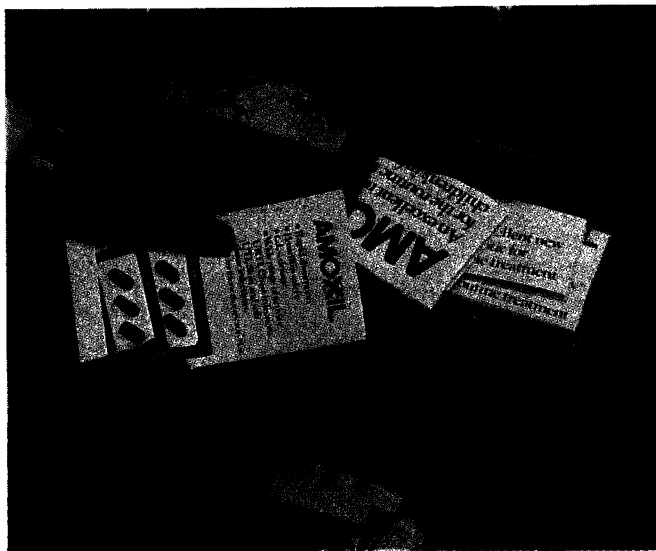

Outstanding oral absorption, not greatly affected by the presence of food, broad spectrum of activity and bactericidal action are among the more notable qualities of Amoxil.

Rapid decisive action coupled with the degree of safety associated with penicillin therapy inspires a high level of confidence in everyday use.

A convenient t.d.s. dosage, independent of meal times, a range of highly acceptable presentations, treatment costing as little as 16p per day – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Extensive clinical trials have demonstrated that in Upper and Lower respiratory infection, Urinary tract and Skin and Soft tissue infections, Amoxil is dependable and trustworthy – as all good friends should be.

Further information on Amoxil (amoxycillin) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

To help you further in your practice Amoxil starter packs are available from your Bencard representative or from the Company

IS IT TRUE...

**they

If aspirin is the choice for chronic rheumatic patients, then longer action is the true criterion of aspirin. And no-one makes it any longer—in effectiveness—than Levius.

Longer sojourn—in the form of aspirin—for relief of day-time pain, with continuing comfort through the night. Sustained high level of total salicylate for anti-inflammatory effect, reducing stiffness and aching joints the following morning.

The Levius tablet rapidly disintegrates into 35,000 separately-encased microgranules, which release the aspirin at a controlled rate. With full dosage, high concentrations are avoided—greatly lowering the incidence of gastro-intestinal irritation, nausea and anorexia.

In the long term treatment of rheumatic diseases, few drugs have gained the wide acceptance of aspirin. And Levius is the logical extension of aspirin.
