### MRS B. DAVEY

It was with the deepest regret that the College learned of the sudden death of Mrs Davey on 27 June 1974. Mrs Davey joined the College in August 1962 as the duplicating room supervisor and was still serving when she died. Her willing work for the College and its Faculties was always of the highest standard and she will be greatly missed.

### PRACTICE ORGANISATION ROOM

Among the many memoranda on different subjects that can be taken from the practice organisation room is the typed script of the last two exhibitions. The Practice Organisation Study continues to display details of some of the most highly organised practices in the country and demonstration tapes are available from the Medical Recording Service.

From 1 August 1974 the British Oxygen Company have mounted a display on the indications for the use of oxygen with contra-indications and some discussion on equipment. This display will continue until mid October 1974.

### CORRECTION

On page 313 of the *May Journal* the second paragraph of the recommendations section should read: "There are 17.9 consultants and 48.2 hospital doctors of all kinds in England and Wales as a whole per 100,000 of the population (House of Commons, 1973). The figures for this area are 11.8 and 29.9 respectively; i.e. 6 consultants, and 18 other staff less per 100,000 of the population."
