

## ***The powerful one***

Because DF 118 is a powerful analgesic it works well in small doses, leaves your patient alert and allows him to go about his everyday tasks normally, without the need for follow-ups until a repeat is necessary.

Transfer a chronic patient to DF118 and notice how dramatically you reduce his analgesic intake. The effective dose, once established, will remain steady and any concomitant therapy is simpler for him to control.

Acute patients, too, benefit from DF118 since

the fully active oral route lessens the need for injections. For patients who cannot swallow tablets Elixir DF 118 offers an alternative form with greater flexibility of dosage.

Low dosage leads to low cost and the basic cost of 28 tablets (an average week's supply) is only 27p.

Each DF 118 tablet contains  
Dihydrocodeine tartrate BP 30mg.

Each 5 ml Elixir DF 118 contains  
Dihydrocodeine tartrate BP 10mg.

**DF 118 subdues the pain, but not the patient.**

Full information is available from **DUNCAN, FLOCKHART & CO. LTD., LONDON E2 6LA.**

# Septrin b.d. in otitis media

## better for him better for mum

**Better for him because Septrin has a powerful activity against the causative pathogens ensuring a rapid response and high success rates.<sup>1,2</sup>**

**Better for mum because the twice-daily dosage of Septrin removes the worry of giving medicine at awkward times of the day and night.**

TRADE MARK

# Amoxil making all the difference in the Black Country.

And throughout Britain. Because doctors everywhere now recognise the advantages of Amoxil in respiratory infections.

Amoxil ensures faster relief of symptoms<sup>1</sup> for all respiratory patients and longer periods free from infection for the chronic cases<sup>2</sup>.

Three main factors are responsible for this. Firstly, Amoxil is more completely absorbed into serum<sup>3</sup>. Secondly, unlike other antibiotics it penetrates equally well through inflamed and uninfamed bronchial membrane barriers<sup>4</sup> to clear even the most entrenched pockets of infection<sup>5</sup>. And thirdly, extensive studies have shown that Amoxil kills bacteria more rapidly than other antibiotics<sup>6,7</sup>.

These three factors, together with a trouble-free dosage, contribute to the Amoxil difference which is appreciated by doctors and patients everywhere.

**makes all the difference

# At risk

'... deaths from heart failure and left ventricular failure ... were the commonest causes of death [in untreated hypertensive patients]: Antihypertensive Agents, *Medicinal Chemistry*, Volume 7, Academic Press, New York and London, 1967, p 9

## The challenge

To lower blood pressure while maintaining cardiac function.

'Aldomet' lowers blood pressure more physiologically by decreasing peripheral vascular resistance. Cardiac output is usually maintained without cardiac acceleration. This differs from antihypertensives which may jeopardise cardiac function by an excessive lowering of cardiac output. 'Aldomet' can also help maintain renal integrity.

# Aldomet®

Methyldopa, MSD

prescribe by name

'Aldomet' is available as 125 mg, 250 mg, and 500 mg tablets – and an injection for emergency use.

® denotes registered trademark.

Detailed information is available to physicians on request.

Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire, EN11 9BU

# This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first twelve months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta and Gibraltar with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Malta and Hong Kong. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £5,997, rising to £6,716 after four years.

On the other hand, if you are older (up to the age of 39) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £8,015.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to

Surgeon Commander L.C. Banks, R.N.,  
( ) Department of the Medical  
Director General (Naval),  
Empress State Building,  
Fulham, London SW6.

## Clearly a distressing infection...

In difficult situations, immediate therapy with Magnapen gives a greater certainty of first-time success even when there are no laboratory reports to guide you.

Magnapen destroys all the bacteria commonly met in general practice, so it can be used with confidence to treat distressing infections rapidly and with the safety of a penicillin.

Full prescribing information on Magnapen for the treatment of severe ENT, respiratory and soft tissue infections is available on request.

Magnapen\* (flucloxacillin with ampicillin in equal parts) is a British product originated by:

# MINOCIN

## in bronchitis

### highly effective sometimes vital

A ball . . . a dog . . . brake lights.

Your seat belt grips preventing a minor cut or bruise—this time.  
But in more serious circumstances that seat belt could save your life.

The same could be true of Minocin.\*

Minocin (minocycline) protects against the hazards of bronchitis, but unlike traditional tetracyclines and some semi-synthetic penicillins is also highly effective against resistant staphylococci—the pathogens which could threaten your patient's life. Staphylococcal pneumonia is the only really life endangering infective hazard in bronchitis.<sup>1</sup>

So whenever you treat bronchitis be sure from the start and put safety first with Minocin.

Presentation: Blister packs of 9 and 45 tablets  
each containing 100mg minocycline as hydrochloride.

Full prescribing information is available.

NOW PUBLISHED BY LONGMAN

# Medical and Biological Illustration

The Journal of the Institute of Medical and Biological Illustration

Edited by RICHARD MORTON

Medical and Biological Illustration is a journal that covers the use of all audio-visual media used for the practice, research and teaching of medicine and other life sciences. From the producer's point of view the Journal is therefore of interest to artists, graphic designers, photographers, cinematographers, television personnel, audio specialists, educational technologists. The Journal reports the work they are doing in their own particular speciality and is an important means of keeping up to date. The users of communication media either as teachers, research workers, writers or publishers find Medical and Biological Illustration not only a useful contact with producers, but also a vehicle in which to publish their own results on the use of audio-visual techniques in their own particular fields.

This ability to bring together producer and user continues to be one of the most important functions of the Journal. This is achieved through original contributions, abstracts from the literature, book reviews, and notes on new equipment and methods. This is the only Journal in any language which consistently covers at an international level all aspects of design, production, application and evaluation of all the different media in the medical and biological sciences.

Published quarterly in February, May, August and November.

Volume 26, 1976

Annual subscription    £8.00    \$SA £24.00

# **Talpen** talampicillin **makes ordinary ampicillin ...ordinary**

Talpen is particularly well absorbed in comparison to ordinary ampicillin

**Peak blood levels are twice as high  
and are usually achieved in half the time<sup>1</sup>**

**The incidence of diarrhoea is greatly reduced<sup>2</sup>**

**The t.i.d dosage is more convenient.**

Following oral administration, Talpen is particularly well absorbed and rapidly hydrolysed to give high blood levels of ampicillin. Talpen makes more ampicillin available more quickly.

Talpen has proven its reliability over a wide range of infections, including respiratory infections where it has achieved a 95% success rate.<sup>2</sup> It has also been shown<sup>2</sup> that with Talpen there is a significant reduction in the incidence of diarrhoea, a common and sometimes troublesome occurrence with oral ampicillin.

Talpen, at a dosage of one tablet tid, offers distinct advantages over ordinary ampicillin which recommend it as the new standard therapy for routine infections.

**Indications:** Typical indications include: Acute and Chronic Bronchitis, Pneumonia, and ENT infections.

**Usual Adult Dosage:** One tablet three times a day.

Each tablet contains 250mg of the ampicillin ester, talampicillin hydrochloride.

**Contra-indication:** Penicillin hypersensitivity.

**Precaution:** Talpen is not recommended for patients with severe renal or hepatic impairment.

**Side-effects:** As with other penicillins. An erythematous rash may occasionally occur, the incidence is particularly high in patients with infectious mononucleosis.

Each 250mg of talampicillin hydrochloride is chemically equivalent to 169mg of ampicillin. Further information is available on request:

1. Jones, K.H., et al., 1975, to be published. 2. Br. J. Clin. Pract., 1975, 29, 255.

## **Vocational Training for General Practitioners**

Applications are invited for two posts in the 3-year Vocational Training Scheme, based on the Royal Postgraduate Medical School at Hammersmith Hospital.

The two trainees will start their course in May or June, by arrangement. The period up to 31st July will be spent in a local general practice. Thereafter the trainees will spend six months as SHO in each of the following hospital-based specialties:—

Medicine

Casualty

Obstetrics & Gynaecology

Paediatrics

They will finish their 3-year course by returning for the remainder of the period to a training general practice.

Experience in the ENT, eyes and dermatology outpatient departments will be available.

Throughout the scheme there will be a day release course.

Whilst the scheme has been designed primarily to meet the requirements of candidates sitting the MRCGP examination, facilities will also be available for those wishing to write an MD thesis, or prepare themselves for the MRCP and other higher diplomas.

Further details and application forms obtainable from and returnable to the Medical Staffing Assistant, Personnel Department, Hammersmith Hospital, Du Cane Road, London W12 0HS (tel. 01-743 2030 ext. 325) by 26 January.

## **ANNUAL SPRING MEETING**

The Annual Spring Meeting of the College will be held at Sheffield on 23-25th April 1976

Those interested should apply to Dr M. E. Rawlin, Honorary Secretary, North Midlands Faculty, 87 Rackford Road, North Anston, Sheffield.

Full details will be published in the *Journal* later.

The British Postgraduate Medical Federation has now published its programme of Courses for General Practitioners for the period January to August 1976. These programmes will be distributed automatically to General Practitioners in the National Health Service in the Four Thames Regional Health Authorities through their local Family Practitioner Committees.

Any other General Practitioners wishing to receive a copy of this programme, should forward a stamped, addressed foolscap envelope to:

The General Practitioner Dept. Section 63 Medical (JGP). British Postgraduate Medical Federation, 14 Ulster Place, London NW1 5HD.

No applications will be accepted by telephone.

**TRAINEE** wanted for one year commencing 1 April 1976 or soon afterwards, in three-man semi-rural practice five miles south of Peterborough. New health centre with all facilities. Ample time for study for diplomas or M.R.C.G.P. examination. One partner is course organiser for vocational training at Peterborough District Hospital, and the trainee will be able to join in fully with all course activities. Comprehensive introduction to all aspects of modern general practice. Modern furnished bungalow. Write to: Dr C. Hart, The Health Centre, Yaxley, Peterborough.

**General practice or internal medicine clinical practice.** Permanent position with established proprietary hospital in Charleston, West Virginia. E.C.F.M.G. Complete pension and hospitalisation benefits. 15,000 pounds. Contact Dr David F. Harris, Staats Hospital, Charleston, West Virginia 25302. U.S.A.

**CHESTER.** Partnership in teaching practice of 3,000 patients, having close associations with Liverpool and Manchester Universities. Suit middle-aged practitioner who wishes to teach undergraduate and trainees, and work a 20-30 hour week in fine premises, in a beautiful town, for a little less than full pay. Dr Jeffs, 10 Hoole Road, Chester. Tel. Chester 26256.

#### COLLEGE TUTOR

Applications are invited for the Honorary post of College Tutor to the Torbay Area, Devon. Applications to Dr Sheila Fraser, F.R.C.G.P., Cornerways, Dragon's Well Road, Brentry, Bristol, BS10 7BU.

Readers are asked to mention *The Journal of the Royal College of General Practitioners* when replying to all advertisements.

## *Journal of the Royal College of Physicians of London*

This Journal is concerned with the integration of scientific disciplines in the practice of medicine and, by providing a wide ranging commentary on the growing points of medicine, is an essential complement to the specialised journals.

# Upjohn travelling fellowships 1976

As in previous years Upjohn is pleased to announce that Travelling Fellowship Awards are available in 1976.

These Awards are made to general practitioners wishing to further their postgraduate training (outside Section 63 of the National Health Act 1958) by taking a course of study at a hospital or centre of their choosing in the British Isles.

Applications for Awards are considered by the Education Committee of the Royal College of General Practitioners within the terms of the Fellowship Rules.

Upjohn have mailed application forms and brochures to doctors on their mailing list and applications *must* be in the hands of The Secretary, the Royal College of General Practitioners, 14 Princes Gate, Hyde Park, London SW7 1PU, by 31st May 1976.
