MINOCIN
in bronchitis
highly effective sometimes vital

A ball... a dog... brake lights.
Your seat belt grips preventing a minor cut or bruise—this time.
But in more serious circumstances that seat belt could save your life.

The same could be true of Minocin.*

Minocin (minocycline) protects against the hazards of bronchitis,
but unlike traditional tetracyclines and some semi-synthetic penicillins
is also highly effective against resistant staphylococci—the pathogens
which could threaten your patient's life. Staphylococcal pneumonia
is the only really life endangering infective hazard in bronchitis.1
So whenever you treat bronchitis be sure from the start
and put safety first with Minocin.

Presentation: Blister packs of 8 and 45 tablets
each containing 100mg minocycline as hydrochloride.
Full prescribing information is available.

*Trademark
Amoxil making all the difference in respiratory infections everywhere.

And throughout Britain. Because doctors everywhere now recognise the advantages of Amoxil in respiratory infections.

Amoxil ensures faster relief of symptoms for all respiratory patients and longer periods free from infection for the chronic cases.

Three main factors are responsible for this. Firstly, Amoxil is more completely absorbed into serum. Secondly, unlike other antibiotics it penetrates equally well through inflamed and uninflamed bronchial membrane barriers to clear even the most entrenched pockets of infection. And thirdly, extensive studies have shown that Amoxil kills bacteria more rapidly than other antibiotics.

These three factors, together with a trouble-free dosage, contribute to the Amoxil difference which is appreciated by doctors and patients everywhere.

makes all the difference in respiratory infections everywhere.
better for him better for mum

Better for him because Septrin has a powerful activity against the causative pathogens ensuring a rapid response and high success rates.¹,²

Better for mum because the twice-daily dosage of Septrin removes the worry of giving medicine at awkward times of the day and night.

Septrin contains trimethoprim and sulphamethoxazole.

THE MEDICAL USE OF
PSYCHOTROPIC DRUGS

Few problems are causing more concern at present, both within the profession and among the public. What is the doctor's role? Are psychotropic drugs the equivalent of alcohol? How far should patients be encouraged to 'stand on their own feet' or be treated with these drugs?

These and other problems are discussed in this report of a symposium sponsored by the Department of Health and Social Security, and published as Supplement No. 2 to the Journal of the Royal College of General Practitioners, 1973.

Obtainable from the Longman Group Ltd., 43 Annandale Street, Edinburgh EH7 4AT. Price: 1.75p.

PRESENT STATE AND FUTURE NEEDS OF
GENERAL PRACTICE

Reports from General Practice Number 16

Wherever general practice or family medicine is studied the Present State and Future Needs of General Practice series is read. The latest edition was published in March 1973, and surveys the problems and position of general practice. It was produced by the Royal College of General Practitioners and is available now from the Longman Group, 43-45 Annandale Street, Edinburgh, EH7 4AT, Scotland. Price: £1.50 ($5).
**TRAINEE VACANCY**

PHELPS, M.D., Department of Family Medicine and Practice, 777 South Mills Street, Madison, WI 53715. Telephone: (608) 263–4550.

An Equal Opportunity Employer

We welcome applications from minorities and females.

THE LEICESTER VOCATIONAL TRAINING SCHEME

Help to plan your own programme in consultation with the Course Organiser. Flexibility is the feature of the scheme which aims to provide appropriate training for all entrants to General Practice. Whether for the three year planned course or any subdivision thereof.

FULL TRAINING PROGRAMME

1. An introductory period in General Practice.

2. Four successive six month appointments on the Senior House Officer grade in any of the following specialties—General Medicine, Paediatrics, Obstetrics, Accident Emergency and Orthopaedics, Psychiatry, General and Geriatric Medicine, Anaesthesics, Ear, Nose and Throat and Dermatology. The Hospital posts are at The Leicester Royal Infirmary, The Leicester Royal Infirmary Maternity Hospital, Leicester General Hospital, Groby Road Hospital, Carlton Hayes Hospital and the Towers Hospital.

3. A final period in a Teaching General Practice with day release for training in Ophthalmology, Ear, Nose and Throat, Paediatrics, Dermatology, et cetera.

4. A half day release programme runs continuously throughout the three year course and is designed to cover the syllabus in preparation for the MRCPGP Examination.

Doctors who wish to undertake part of this course to complete their own training plan will be welcome, especially for one year attachments to training practices. Four places on the full training programme are available to commence the introductory period in General Practice in October 1976. Places are also available for April 1976 and December 1976.

Application form and further details to be obtained from the District Administrator, South West District, The Leicester Royal Infirmary, Infirmary Square, Leicester LE1 5WW.
VOCATIONAL TRAINING FOR GENERAL PRACTICE
BRISTOL UNIVERSITY MEDICAL POSTGRADUATE DEPARTMENT

A three-year course is offered of Vocational Training for General Practice, consisting of two years' hospital and elective training and a one-year traineeship in an approved practice.

After a short period of orientation of one to three months in the training practice, trainees start hospital appointments at S.H.O. level in a Bristol hospital:
1. six months in Medicine and Obstetrics with Gynaecology; two three-month periods in Paediatrics and Geriatrics; a six month period, partly or wholly elective, when opportunities will be given to gain experience in special hospital and other departments;
2. an alternative rotation is offered of six months each in Accident and Emergency work, Paediatrics, Psychiatry and Geriatrics.

The trainee will complete the year in practice after the hospital appointments. There will be a half-day release course during University term time throughout the three years.

The period of orientation should start before or on 1 February 1977.

Applications are invited from suitably qualified practitioners, giving details of previous experience, the names and addresses of two referees and quoting a date when they would anticipate being able to start the preliminary orientation period in practice. Applications should be sent before 31 May 1976.

It may be possible also to assist practitioners wishing to complete requirements for vocational training, who have already in part fulfilled the necessary criteria.

Applications and requests for further information should be sent to:
The Adviser in General Practice,
University of Bristol,
Medical Postgraduate Department,
21 Woodland Road,
BRISTOL, BS8 1TE.

UNIVERSITY OF DUNDEE
Senior Lecturer in the Department of General Practice
(Re-advertisement)

Applications are invited for this new post from registered medical practitioners who have had considerable experience in general practice. Applicants should hold the Diploma of M.R.C.G.P.

Salary will be commensurate with the emoluments of Principals in general practice, with superannuation provision.

Further particulars of the post may be obtained from the Secretary of the University of Dundee, Dundee, DD1 4HN to whom applications (14 copies - overseas applicants 1 copy) including the names addresses of two referees should be sent as soon as possible
Please quote Ref. Est/20/76 RC

COLLEGE TUTOR

Applications are invited for the Honorary post of College Tutor to the Exeter district. Applications to Dr Sheila Fraser, F.R.C.G.P., Cornerways, Dragon's Well Road, Brentry, Bristol, BS10 7BU.

Opinions expressed in The Journal of the Royal College of General Practitioners and the supplements should not be taken to represent the policy of the Royal College of General Practitioners unless this is specifically stated.

Between Harley Street and Portland Place. First floor self-contained consulting room and office. Rent: £1,700 plus services. Lease: 3 years renewable. Use of waiting-room and receptionist. Licenced for two. Phone 01 580 1616.

CLASSIFIED ADVERTISEMENTS

Classified advertisements are welcomed and should be sent to: The Journal of the Royal College of General Practitioners, Longman Group, Burnt Mill, Harlow, Essex. The charge for this service is 50p per line, plus 25p if a box number is required. Fellows, members and associates of the Royal College of General Practitioners may claim a ten per cent reduction.

The inclusion of an advertisement in this Journal does not imply any recommendation and the Editor of the Journal of the Royal College of General Practitioners reserves the right to refuse or stop the insertion of any advertisement.

Family Physician to join faculty, University of Louisville School of Medicine. Apply to William P. VonderHaar, M.D., University of Louisville, Department of Family Practice and Community Health, 801 Barret Avenue, Louisville, Kentucky, 40204. Phone 502 389-6185.

A doctor can gain a lot from 5 years in the Royal Navy.

As a qualified doctor, you can join the Royal Navy for 3 or 5 years on a Short Service Commission.

In that time, you'll spend up to a year practising medicine in a Naval ship.

You could have the chance of working and living overseas for a time.

And you'll be able to do your General Professional Training in one of the clinical and medical scientific disciplines at a Naval hospital or an RN establishment.

At sea.

After a short Officers course at the Royal Naval College, Dartmouth, and a basic course in maritime medicine at the Institute of Naval Medicine, Alverstoke, you'll normally go to sea for about 12 months.

You'll be responsible for the medical care of some 250 to 500 men in your ship (and advise the Captain on health and environmental problems).

You won't lose touch with modern medicine, as you can visit local hospitals in ports of call and use the teaching aids provided by your Naval tutor.

Postgraduate training and specialisation.

After your sea-time, career counselling will determine your postgraduate training programme.

There are opportunities for General Professional Training in preparation for a clinical career in general practice, the hospital specialities, or the medical scientific disciplines such as Aviation, Underwater, Submarine and Nuclear Medicine; or in occupational and community medicine.

If you decide to transfer to a 16-year pensionable Commission, or a permanent Commission, you could move on to recognised higher training programmes which include research training and higher training posts in civilian units.

At Alverstoke, the Dean of Naval Medicine co-ordinates postgraduate medical training and research.

Naval hospitals.

The two largest are at Haslar (near Portsmouth) and Plymouth.

They undertake the care of Naval personnel, their families and NHS civilians, providing a broad spectrum of clinical material. Both hospitals are recognised for higher training in the major specialties.

There is a full range of modern, technical equipment, and the nursing and paramedical staff are highly skilled.

There are smaller hospitals in Malta and Gibraltar.

Salary.

If you join us immediately after registration, your salary will be £5,997 as a Surgeon Lieutenant.

You can, however, join at any age up to 39. In that case, your postgraduate experience is taken into account, and you could join as a Surgeon Lieutenant Commander earning £8,015 a year.

If you leave at the end of your 3 year Commission, you'll receive a tax-free gratuity of £1,500, or, after 5 years, £3,000.

If you decide to stay on, you can apply for a 16-year pensionable Commission or a permanent Commission.

The salary structure is based on an analogue computed from the average earnings of general practitioners in the NHS, with an additional X factor. There is extra pay for recognised postgraduate qualifications and Senior Specialist or Consultant status.

If you're posted overseas, you can, of course, take your family with you. There are, too, generous boarding school allowances for your children, starting at £807 for your first child.

For more information, write to Surgeon Commander L. C. Banks, MB B Ch MFC M RN, (0113) 394 1114), Medical Directorate General (Navy), Ministry of Defence, Empress State Building, London SW6 1TR.
