Dyspepsia patients have one need in common

Lasting relief from pain and discomfort.

Traditional treatments, such as antacids, provide only temporary relief. Maxolon not only relieves symptoms effectively, it also prevents them arising. A month's treatment with Maxolon offers freedom from symptoms in 4 out of 5 dyspepsia patients.¹

So next time a patient presents with dyspepsia, prescribe Maxolon. That way, he can stop worrying about his symptoms, and so can you.

¹Based on published reports in over 1 100 patients.

Maxolon

Full prescribing information is available on request.

Maxolon* (metoclopramide) is a product of
Beecham Research Laboratories,
Brentford, England.

CHURCHILL LIVINGSTONE

Uses of Epidemiology

J.N. Morris

Third Edition 328 pages illustrated £5.95

This book is mainly about epidemiology as a way of learning, of asking questions and getting answers that lead to further questions. It bridges the gap between clinical and laboratory medicine on the one hand and the social sciences on the other. Much of the illustrative material is drawn from the author's own work in the field of coronary heart disease, studies of the working of health services, and from his experience of policy-making on health and social issues. It will be of great interest not only to medical undergraduates, but also to clinical research workers, epidemiologists, health administrators and anyone who is concerned with community or social medicine.

Royal College of General Practitioners/Stanning Overseas Fellowships 1976

Through the generosity of Mr. Ellis Stanning, the Royal College of General Practitioners offers overseas travelling fellowships for younger doctors which are awarded annually with the following aims:

“To provide an opportunity for study and to compare general practice abroad; to enable study of some particular aspect of general practice abroad; to learn about other systems of medical care; to report on their experience to the profession in the United Kingdom.”

Applications for these travelling fellowships are now invited from members or associates of the College who are principals in general practice in the United Kingdom of at least three years' standing, and who are under 38 years of age at the time of application.

Enquiries should be made to the Secretary, the Royal College of General Practitioners, 14 Princes Gate, London SW7 1PU. The closing date is 15 October 1976.

D.I.Y.

Vocational training assistantship. Choose your own training course in a semi-rural dispensing practice with cottage hospital and maternity unit and all open access facilities. University day release courses and specials as required. Accommodation available. Apply:- Drs. Kennon & Billingham, Annandale, Mobberley Road, Knutsford, Cheshire. Knutsford 52311.

The powerful one

Because DF118 is a powerful analgesic it works well in small doses, leaves your patient alert and allows him to go about his everyday tasks normally, without the need for follow-ups until a repeat is necessary.

Transfer a chronic patient to DF118 and notice how dramatically you reduce his analgesic intake. The effective dose, once established, will remain steady and any concomitant therapy is simpler for him to control.

Acute patients, too, benefit from DF118 since

the fully active oral route lessens the need for injections. For patients who cannot swallow tablets Elixir DF 118 offers an alternative form with greater flexibility of dosage.

Low dosage leads to low cost and the basic cost of 28 tablets (an average week's supply) is only 37 ½p.

Each DF118 tablet contains Dihydrocodeine tartrate BP 30mg.

Each 5 ml Elixir DF 118 contains Dihydrocodeine tartrate BP 10mg.

DF 118 subdues the pain, but not the patient.
