‘Tagamet’: the new indication

The remarkable symptomatic relief of peptic ulcer pain noted with ‘Tagamet’ therapy can now be extended to selected dyspepsia patients.

‘Tagamet’ is now indicated for persistent dyspepsia, particularly meal-related upper abdominal pain, in those patients where the reduction of gastric acid is beneficial. The recommended dose is 400 mg b.d.

And really it is as simple as that: technology applied to an age-old problem.

Successfully.

Gastro-technology

Prescribing Information

‘Tagamet’ Tablets, PL 0002/0092, each containing 400 mg cimetidine. 56, £16.63. ‘Tagamet’ Tablets, PL 0002/0063, each containing 200 mg cimetidine. 500, £17.45. ‘Tagamet’ Syrup, PL 0002/0073, containing 200 mg cimetidine per 5 ml. 500 ml, £20.43. Indications Duodenal ulcer, benign gastric ulcer, recurrent and stomal ulceration, oesophageal reflux disease. Other conditions where reduction of gastric acid is beneficial: persistent dyspeptic symptoms, particularly meal-related; prophylaxis of stress-induced gastrointestinal haemorrhage and of acid aspiration (Mendelson's) syndrome; malabsorption and fluid loss in short bowel syndrome. Zollinger- Ellison syndrome. Dosage Adults. Oral. Usual dosage, 400 mg b.d. with breakfast and at bedtime, or, if inadequate, 400 mg q.d.s. daily. Alternatively, 200 mg t.d.s. with meals and 400 mg at bedtime (1.6 g/day), or, if inadequate, 400 mg q.d.s. with meals and at bedtime (1.6 g/day). Treat for at least 4 weeks (6 weeks in benign gastric ulcer). To prevent relapse of duodenal ulcer, 400 mg at bedtime or 400 mg morning and at bedtime. Oesophageal reflux disease. 400 mg t.d.s. with meals and 400 mg at bedtime (1.6 g/day) for 4 to 8 weeks. Prophylaxis of stress-induced gastrointestinal haemorrhage, up to 2.4 g a day divided, to maintain intragastric pH above 4. Prophylaxis of acid aspiration syndrome. 400 mg 90-120 mins before induction of general anaesthesia, up to this dose repeated (parenterally if appropriate) as required if operation is prolonged. 400 mg at start of labour then 200 mg 2 hourly as necessary, suggested maximum 1.6 g. Do not use ‘Tagamet’ syrup. Zollinger- Ellison syndrome. 1.6 g or more a day, divided.

A.B. Usual maximum 2.4 g/day. For full dosage instructions see Data Sheet. Cautions Impaired renal function: reduce dosage (see Data Sheet). Potentiation of oral anticoagulants, phenytoin and theophylline (see Data Sheet). Prolonged treatment: observe patients periodically. Potential delay in diagnosis of gastric cancer (see Data Sheet). Care in patients with compromised bone marrow (see Data Sheet). Avoid during pregnancy and lactation. Adverse reactions Diarrhoea, dizziness, rash, tiredness. Rarely, mild gynaecomastia, reversible liver damage, conduction states (usually in the elderly or very ill), interstitial nephritis, acute pancreatitis. Legal category POM. 11.5.84.

ROYAL COLLEGE OF GENERAL PRACTITIONERS
1984 MEMBERS’ REFERENCE BOOK

The Royal College of General Practitioners has now published the 1984 Members’ Reference Book in the same size and format as last year. The Reference Book includes the Annual Report of Council, the Treasurer’s Report, and reports of the faculties and regional councils of the College. It also includes a comprehensive information section about the College, lists of useful addresses, and a large number of articles about general practice.

A new feature this year is that it has been possible to list all the College’s Fellows, Members and Associates by faculty, thus providing a complete register for the first time.

The 1984 Members’ Reference Book can be obtained from the Publications Sales Office, Royal College of General Practitioners, 8 Queen Street, Edinburgh EH2 1JE, price £17.50 including postage. Payment should be made with order.

£3000

CLASSIFIED ADVERTISEMENTS AND NOTICES

Classified Advertisements are welcomed and should be sent to: The Journal of the Royal College of General Practitioners, 8 Queen Street, Edinburgh EH2 1JE. Copy must be received six weeks before the 1st of the month of issue to ensure inclusion. Every effort will be made to include advertisements received after this date but publication cannot be guaranteed and the advertisement may have to be held over to the following issue.

The charge for space in this section is £6.35 per single column centimetre, plus 30p if a box number is required. Fellows, Members and Associates of the Royal College of General Practitioners may claim a 10 per cent reduction. Replies to box numbers should be sent to the above address, with the box number on the envelope.

The inclusion of an advertisement in this Journal does not imply any recommendation and the Editor reserves the right to refuse any advertisement. All recruitment advertisements in this section are open to both men and women.

Opinions expressed in The Journal of the Royal College of General Practitioners and the supplements should not be taken to represent the policy of the Royal College of General Practitioners unless this is specifically stated.

THE ROYAL COLLEGE OF GENERAL PRACTITIONERS
NORTH AND WEST LONDON FACULTY

Course on Complementary Medicine
13 and 14 November 1984

The North and West London Faculty of the Royal College of General Practitioners is holding a two-day course on Complementary Medicine at the College on 13 and 14 November.

The course includes introductions to acupuncture, Alexander technique, applied kinesiology, autogenic training, biofeedback, chiropractice, herbalism, homeopathy, meditation, naturopathy and osteopathy. What is the evidence for them? What is their place in modern medicine? Indeed, what are they? The philosophical, ethical and scientific aspects are considered.

The course is open to registered medical practitioners. Approval under Section 63 is being sought.

For further details and an application form, please apply to: Mrs Sue Smith, Education Division, The Royal College of General Practitioners, 14 Princes Gate, London SW7.

BRITISH POSTGRADUATE MEDICAL FEDERATION
(UNIVERSITY OF LONDON)

Occupational Medicine for the Part-Timer Course

ROYAL COLLEGE OF GENERAL PRACTITIONERS

SATURDAY OCTOBER 27th 1984
"... Teddy's better too, Grandma. Can we come tomorrow?"

its outstanding safety profile. It is available in three different oral presentations which offer acceptable and convenient therapy for younger patients.

Amoxil – the leading antibiotic prescription for children in Britain.

Rapidly resolves young patients' infections.

Prescribing Information
Indications:
Commonly occurring bacterial infections of the upper and lower respiratory tract, urinary tract, skin and soft tissue.

Presentations:
Amoxil syrup: 125mg and syrup 125mg per 5ml; PL 0008/0088/1.
Amoxil paediatric suspension: 125mg per 1.25ml; PL 0008/0099.
Amoxil capsules: 250mg and 500mg; PL 0008/0085/5.
Amoxil dispersible tablets: 500mg; PL 0008/0077.
Amoxil 3g sachet: PL 0008/0218.
Amoxil tablets for injection: 250mg, 500mg and 1g; PL 0008/0027/2.

The amoxycillin content per dose unit is present as the tribasic dihydrate in the paediatric preparations and as the sodium salt in Amoxil preparations.

Average treatment cost: children: 29p/day (125mg syrup for 6); adults: 39p/day (250mg capsules x 6), dispersible tablets: 39p per tablet (30 pack), 3g sachet: £1.98 per sachet.

Dosage:
Children's dosage (up to 10 years):
Oral: 125mg three times a day. In severe infections doses should be doubled.

Adult Dosage:
Oral: 250mg 3 times a day. In severe infections doses should be doubled.

Intravenous: 300mg IM 6 hourly (or more frequently if necessary) in moderate infections. 1g IV 6 hourly in severe infections.

Contra-Indications:
Amoxil is a penicillin and should not be given to penicillin hypersensitive patients. Side effects, as with other penicillins, are usually of a mild and transitory nature; they may include diarrhoea or indigestion. Occasionally a rash may occur, in which case treatment should be discontinued.

Since Amoxil is a penicillin, problems of cross-sensitivity are unlikely to be encountered.

Further information on Amoxil (amoxycillin) is available from:
