"The placid individual often has no subjective symptoms until serious complication occurs."†

'Nefrolan'* brand clorexolone enables the blood pressure to be maintained at a safe level without discomfort or inconvenience to the patient.

One 10 mg. tablet once or twice daily is usually sufficient. Higher dosage can be given, if necessary, and additional antihypertensive agents can be introduced, if required.

At higher dosage levels 'Nefrolan' is an efficient oral diuretic, and of benefit in those cases of water retention which are helped by diuretics.

'Nefrolan' is presented as 10 mg. tablets for hypotensive use and 25 mg. tablets for diuresis and more severe hypertension.

†"Hypertension : Management and Results." *Proc. R. Soc. Med.*, **56**, 403, 1963.

Baillière, Tindall & Cassell

This advertisement, the first to appear under this new imprint, signifies the fusion of Baillière's and Cassell's medical books into a single list. This fusion is a result of the recent amalgamation of the Cassell and Baillière organizations, both more than a century old, which for many years have published for the medical profession. Baillière, Tindall and Cassell will continue to reflect the progress of medicine by providing a broad spectrum of publications on medical and ancillary subjects.

Psychiatric Illness

DIAGNOSIS AND MANAGEMENT

FOR GENERAL PRACTITIONERS AND STUDENTS

by **H. MERSKY**, M.A., B.M., B.Ch., D.P.M., *Consultant Psychiatrist, Saxondale Hospital, Nottingham*, and **W. LAWTON TONGE**, M.D., D.P.M., *Consultant Psychiatrist, United Sheffield Hospitals*.

Foreword by PROFESSOR E. STENGEL, M.D. (Vienna), F.R.C.P.

The general practitioner is having to deal increasingly with patients suffering from psychiatric illness who cannot be referred to a specialist. This new, eminently readable book provides the guidance, advice and technical information the doctor needs to manage the psychiatric patient. It deals not only with the usual psychiatric syndromes but also with the psychological problems of childhood, sexual adjustment, marriage and anti-social behaviour.

TO-DAY'S DRUGS

Published in December, 1964

This book is based on a series of review articles which were printed in the "To-day's Drugs" section of the **BRITISH MEDICAL JOURNAL** between January 1963 and May 1964. These articles have been edited and brought completely up to date so as to form an authoritative and practical guide to modern therapeutics. The book is designed to cover the drug treatment of those common conditions which are met with in general and hospital practice. There are important sections dealing with antibiotic therapy, cardiovascular conditions, rheumatic disorders, oral contraceptives, and the special problems involved in paediatric and geriatric prescribing. Special attention has been paid to the precautions which should be taken in using these drugs and their toxic and side-effects. This book should be of value to all doctors concerned in the day-to-day treatment of patients.

enzyme therapy for cardiovascular disorders

VASOLASTINE consists of enzymes which catalyse fat and cholesterol and those amines which take part in regulating the blood pressure.

The effect of Vasolastine is to resolve deposits of atheroma with consequent increasing oxygenation of the tissues.

Vasolastine is non-toxic and no side effects have been reported even with high dosages or prolonged treatment. There are no contra-indications.

Manufactured by Enzypharm C.V. Holland.

Dear Doctor, I have taken
GUINNESS
for seven days running

and how much better I feel

"... the use of Pentovis orally was effective in relieving the symptoms of senile vaginitis. In the series (30 patients) there was no evidence that the drug had any unpleasant side effects or produced withdrawal bleeding. Pentovis therefore merits further use, as it seems to be a valuable preparation in the treatment of a distressing and difficult condition."

Roddie, T.W., (1964) Ulster med. J. 33, 62.

"Before the present series, all cases of senile cervicitis or vaginitis or both (in my wards) were treated by vaginal pessaries containing 0.1 mg. oestrone (B.P.C.) daily. No oral treatment was given. There is no doubt that the results with Pentovis are better, in that more effective and quicker improvement is obtained."

Sharman, A., (1964) J. Endocrin 29, 209.

"INSTANT BREATH"

In the asthmatic attack — profound relief in seconds

One or two inhalations from *Medihaler-iso* Forte can provide relief of broncho-spasm comparable in speed and degree to that achieved by injection. Yet for the patient there is nothing simpler or more convenient to use whenever required. Each dose (0.4 mg. isoprenaline sulphate) contains over 85% by weight of particles between 2 and 7 microns in diameter—optimum for retention in the lungs. Treatment economy is assured because each vial delivers over 300 doses at a cost of less than $\frac{1}{2}$ d. per dose.

Medihaler-iso Forte, *Medihaler-iso* and *Medihaler-epi* are now supplied with a new-style plastic oral adapter.

Solace for 365

frustrating days...

Compulsive eaters need more than just a curb on appetite

Overeating is often a defensive reaction to stress — anxiety, boredom, loneliness, frustration.

DUROPHET-M contains not only the most effective appetite depressant available today (laevo- and dextro-amphetamine, ratio 1 : 3) but also the well-tolerated calmative methaqualone, to alleviate those underlying stresses — and make weight loss more certain. Capsules are available in two strengths stated in terms of laevo- and dextro- amphetamine content. Both strengths contain 40 mg. methaqualone.

'FRAGRANT CLOUD'

(From Harry Wheatcroft & Sons, Edwalton, Nottingham.)

From early summer until the first hint of the autumn frosts, these coral-red flowers will float a cloud of fragrance throughout your garden. 'Fragrant Cloud' is a rare combination, it has healthy, vigorous growth, well shaped, free-flowering blooms, and, as its name implies, a heady, intoxicating scent. It's no wonder that 'Fragrant Cloud' was the only rose, out of 249 entries, to win the coveted Gold Medal of the National Rose Society.

MIGRAINE?

At the first sign of migraine new **ERGODRYL*** is indicated. Ergodryl—a combination of ergotamine tartrate, caffeine citrate and Benadryl*—exerts a four-fold action in the symptomatic relief of migraine and Horton's syndrome (histamine headache). Ergotamine, potentiated by caffeine, constricts the cranial blood vessels, causing a reduction in cerebral blood flow. Benadryl counteracts any tendency to nausea and vomiting, exerts a potent antihistaminic effect and sedates the patient. Ergodryl is available in containers of 10 and 100 capsules.

**Trade mark*

NEW ERGODRYL!

This is no ordinary tetracycline tablet

It has the widest range of activity of the broad-spectrum antibiotics available today, for, in addition to tetracycline, it contains a highly effective antifungal antibiotic, nystatin, which can prevent the monilial superinfection often found when tetracycline alone is given. Thus, the patient receiving this tetracycline tablet is protected against monilial side-effects such as nausea and vomiting; diarrhoea; ano-genital pruritus; and thrush¹

a major discovery for rheumatic disorders

INDOCID

INDOMETHACIN

REGD

'Indocid' is a new, non-steroid anti-inflammatory agent with analgesic and antipyretic properties, chemically unrelated to the corticosteroids, butazones or salicylates.

Widespread clinical experience has shown that 'Indocid' rapidly relieves pain and inflammation, and allows greater mobility. In osteoarthritis,

'Indocid' is often effective where other agents are inadequate; it has given excellent results in osteoarthritis of the hip.

In rheumatoid arthritis, objective evidence of effect may be seen as a measurable reduction of joint swelling.

'Indocid' has also proved effective in ankylosing spondylitis, gout, and certain soft-tissue disorders.

NOW AVAILABLE FOR GENERAL PRESCRIBING

'Indocid' is supplied as 25 mg capsules. Detailed information is available to physicians on request.

which hypertensive patients are best treated with 'Esbatal'?

All new patients requiring an adrenergic neurone-blocking agent

"Bethanidine sulphate is an important and potent hypotensive drug, and by its use the regime of many patients has been simplified and side-effects avoided." *J. Irish med. Ass.*, 1965, 56, 9.

"While expecting the symptoms of adrenergic neurone blockade, we have been pleasantly surprised by the lack of other side-effects, and especially by the absence of diarrhoea." *Lancet*, 1962, ii, 897.

Male hypertensives

'Esbatal' does not cause impotence, but as with other adrenergic neurone-blocking agents, failure of ejaculation may occur. When this causes concern, withdrawal of 'Esbatal' for 24 hours usually reverses this side-effect. Good control of blood pressure is regained rapidly on resuming treatment. (See *Lancet*, 1964, ii, 659.)

Patients in whom other forms of hypotensive therapy cause diarrhoea

"... a useful alternative to established means of therapy. It seldom causes diarrhoea, and the dose is easily manipulated." *Lancet*, 1964, ii, 659.

When rapid control of blood pressure is essential

"... it has the advantage of more rapid action and excretion so that its dose can be increased more rapidly and the blood pressure brought under control more quickly." *Brit. med. J.*, 1964, ii, 865.

"Bethanidine sulphate is of particular value for the rapid reduction of high blood pressure" *J. Irish med. Ass.*, 1965, 56, 9.

Rapid action—Simpler management—Minimal side-effects

iron before breakfast

To prescribe iron before breakfast would be asking for trouble with ordinary ferrous sulphate tablets. Even taken after meals and in divided doses, such tablets cause irritation and unpleasant side effects in many patients, often leading to the abandonment of therapy. But "One Ferro-Gradumet tablet before breakfast" is right. This once-daily haematinic is designed to be taken on an empty stomach. Because iron absorption is in inverse proportion to the amount of food present, just one tablet daily, taken before breakfast, gives steady, trouble-free assimilation of ample amounts of iron. Instead of a corrosively large dose of ferrous sulphate being released in the stomach, the contents of the Gradumet—a unique controlled-release vehicle which is independent of gastro-intestinal chemistry and motility—are slowly leached out over a period of hours throughout the gastro-intestinal tract.

Presentation Each red Ferro-Gradumet Filmtab® (film-coated tablet, Abbott) contains the exsiccated equivalent of 525 mg ferrous sulphate B P, providing 105 mg elemental iron—a sufficient daily dose for all cases of iron deficiency.

FERRO-GRADUMET®

® *Filmtab and Gradumet are registered trade marks of*
ABBOTT LABORATORIES LIMITED • QUEENBOROUGH • KENT

THE INTERNATIONAL STANDARD OF LENGTH...

... is the Metre, which is defined as equal to 1,650,763.73 times the wavelength *in vacuo* of the orange line emitted by the atom of krypton of mass 86, in dry air at 15°C and at standard atmospheric pressure.

This definition of the Metre was accepted by the International Committee of Weights and Measures in 1958. The International Prototype Metre, which was established in 1889 was the distance between two transverse graduation lines engraved on a platinum-iridium bar, kept at Sèvres, near Paris.

TRANSVASIN is the standard therapy... ...for the relief of rheumatic symptoms

Patients suffering from rheumatic lesions obtain rapid relief with Transvasin, the well-proven and economical therapy. The esters of nicotinic, salicylic and p-amino-benzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a most valuable adjuvant in the treatment of both osteo- and rheumatoid-arthritis.
