Transvasin
brings the esters of NICOTINIC ACID
SALICYLIC ACID
p-AMINOácOBENZOIC ACID
to the focal point of soft tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed.* Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Salicylic acid tetrahydrofurfuryl-ester 14%
Nicotinic acid ethyl-ester 2%
Nicotinic acid n-hexyl-ester 2%
p-Aminobenzoic acid ethyl-ester 2%
Water-miscible cream base ad 100%

* Therapeutische Umschau VIII, 1952, 10, 143

Transvasin is available in 1 oz. tubes, basic price 2/6 plus 9d. P.T., and is not advertised to the public. Samples and literature will be gladly sent on application.

The right diet at your fingertips

This filing box, designed for the consulting room desk, contains an indexed supply of diet cards for 16 different conditions. The cards are planned to include specimen daily menus which facilitate the patient's co-operation and save the doctor's time. This is one of the services offered free of charge to the medical profession by the Energen Dietary Service.

In special cases, clinical considerations often necessitate the preparation of a diet which takes into account the individual requirements of the patient. On receipt of appropriate information from the practitioner, such diets can be specially constructed and sent through the post; or a consultation can be arranged with a senior dietitian.

The Energen Dietary Service is staffed by fully qualified dietitians, under close medical supervision. It offers independent information and assistance to the medical profession in all dietary and nutritional matters.

Requests for the Diet Card Filing Box, or other inquiries should be addressed to:

THE PHYSICIAN IN CHARGE, ENERGEN DIETARY SERVICE,

A NEW Development in analgesics

Panadol (N-acetyl-p-aminophenol) is a potent analgesic and antipyretic, new to this country. Clinical trials have shown it to be much better tolerated than Tab. Codein. Co. Panadol is therefore a valuable alternative to currently-used analgesics in arthritic, muscular and neuralgic pain, headaches and colds.

NO ASPIRIN—no gastric irritation
NO PHENACETIN—no methaemoglobinemia
NO CODEINE—no constipation

Packings: tablets, 0.5 g., in bottles of 100 and 500. The basic N.H.S. cost of 24 tablets is 1/11½d. Dosage: 1-2 tablets, generally not more than eight in one day. A sample and Medical literature gladly sent on request.

THE TREATMENT OF
PEPTIC ULCER
WITH "ROTHER" TABLETS

Extract from the British Medical Journal, 1st October 1955, p. 827

"The immediate clinical results were assessed after the first month's treatment in four main groups: (A) pronounced relief (symptom free); (B) definite relief (minor symptoms with no pain); (C) doubtful relief (symptoms persisting but improved); (D) no relief.

"... 81% of cases became symptom free — 70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases.

"Four of the nine cases in groups C and D have elected to go to surgery, and one of the remaining cases has a hiatus hernia as well as a duodenal ulcer. Experience of treating these 'failures' over the past six years leads one to believe that no form of medical treatment will be effective and that surgery is the only hope of relieving their symptoms. In 75% of the cases the patients were of the opinion that the tablets were superior to alkaline powders, and they found that they were able to take foods which they had avoided for years.

"The treatment is ideal for general practice, where its simplicity appeals to both patient and doctor, and, although its mode of action remains an unsolved problem, this should not deter its use in a condition the cause of which remains a riddle. Finally, while the possibility of toxic effects does arise, none have been reported or found in this series; but, as a precaution, the tablets should not be administered to young children."

*Rotber tablets are prescribed on N.H.S. They are not advertised to the public.*
*Packings: Tins of 40, 120, 640; and dispensing size, 720 (P.T. Exempt).*

Samples and literature on request.

NEW approach in
SKIN DISEASE
Inflammation with Infection
DEMands
‘HYDROCORTONE’ AND ANTIBIOTICS

‘HYDRODERM’ provides the anti-inflammatory steroid hydrocortisone, incorporated in an emollient base with the antibiotics neomycin and bacitracin. Specific activity is provided against both inflammation and infection. Use of these two broad-spectrum antibiotics assures protection from a wide variety of organisms commonly found in skin lesions. Neither neomycin nor bacitracin is likely to cause a local reaction, and their use does not contra-indicate the concurrent use of other antibiotics systemically.

Topical Ointment of ‘HYDRODERM’ is supplied in tubes of 5G. and 15G.

PAEDIATRICS FOR THE PRACTITIONER
Edited by WILFRID GAI SFORD, M.D., M.Sc., F.R.C.P., and REGINALD LIGHTWOOD, M.D., F.R.C.P., D.P.H.
In three volumes and Index volume, with 1956 Supplement. Fully illustrated.
£14 10s. net per set. Carriage and packing extra.
"These volumes, well produced and liberally illustrated, should prove of great value to general practitioners in this important and satisfying field of medicine." The Lancet.

MODERN TRENDS IN OBSTETRICS AND GYNAECOLOGY
Second Series. Edited by KENNETH BOWES, M.D., M.S.(Lond.) M.B., Ch.B.(L’pool), F.R.C.S., F.R.C.O.G.
Pp. xv+394+Index. 176 Illustrations. 60s. net, by post 1s. 5d. extra.
"... the book should prove of real value to all those who wish to know more about the complicated yet interesting features of this branch of medicine." Medical Press.

MODERN TRENDS IN ORTHOPAEDICS
Second Series. Edited by SIR HARRY PLATT, LL.D., M.D., M.S., F.R.C.S., F.A.C.S.
Pp. x+320+Index. 226 Illustrations. 65s. net, by post 1s. 5d. extra
"This well-produced volume will be invaluable to readers throughout the world." British Medical Journal.

MODERN TRENDS IN PSYCHOSOMATIC MEDICINE
Edited by DESMOND O’NEILL, M.C., M.D., M.R.C.P., D.P.M.
Pp. xi+375+Index. 29 illustrations. 55s. net, by post 1s. 5d. extra.
"Written by a large group of acknowledged experts in their own specialties, this book is authoritative and completely free from bias; it is completely up-to-date, for much of the work reported between its covers is still in progress... This book should be read by everybody in medicine." Postgraduate Medical Journal.

CORTISONE AND ACTH in Clinical Practice
Under the General Editorship of W. S. C. COPEMAN, O.B.E., M.D., F.R.C.P.
Pp. xi+239+Index. 29 illustrations. 25s. net, by post 1s. 6d. extra
"This work, the only one published in this country on the subject, will be welcomed by practitioners now that Cortisone and hydrocortisone are freed for general prescription... an accurate, informed, concise and lucid survey of current opinions..."—The Lancet.

BRITISH PRACTICE IN RADIOThERAPY
Pp. xii+516+Index. 142 illustrations. 85s. net, by post 1s. 8d. extra.
"This is a book which demands the careful study of all those who are engaged in the treatment of malignant disease or have to advise on its treatment. It supplies a record of achievement of which our country may well be proud and it points the way to further advance. We congratulate the editors on a volume which every medical man may read with advantage and which every expert will study with enthusiasm." British Medical Journal.

Reliable ORAL Penicillin

'Distaquaine' V reduces the number of cases requiring treatment by injection

'DISTAQUAINE' V TABLETS, containing phenoxyethylpenicillin, are the first oral penicillin preparation to offer a reliable alternative to parenteral penicillin therapy.

Being acid-stable, this new form of penicillin is not affected by the gastric acidity of the individual patient and, with its quicker and more efficient absorption, produces a more consistent therapeutic effect than is possible with many other preparations. Reliable oral therapy, therefore, can be achieved with smaller doses, and a consequent reduction in the cost of treatment.

60 mg. tablets; bottles of 30.
basic N.H.S. cost: 6/10d.
